REPORTING SIGNIFICANT TRENDS AFFECTING EDUCATION PROGRESS IN THE SREB STATES

Public College Enrollment, SREB States

Source: SREB analysis of National Center for Education Statistics databases.

Public Two-Year Colleges in the SREB Region Approached Historic Milestone in 2010 — Enrollment Equal to Public Four-Year Colleges

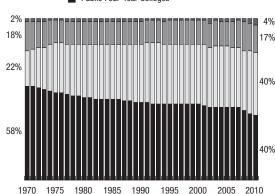

In 1970, enrollment in public two-year colleges in SREB states was 37 percent as much as enrollment in public four-year colleges and universities. Yet two-year college enrollment *gains* outpaced four-year institutions, and by 2010, two-year colleges enrolled nearly as many students. It is likely that enrollment in the SREB region's public two-year colleges exceeded that of public four-year colleges in 2011. Nation-wide, public two-year colleges have enrolled more students than public four-year colleges since 2009. Public two-year colleges accounted for nine out of 10 of all two-year college students, both nationally and in the SREB region.

The pattern of two-year college enrollment differs somewhat by region. More than half of first-time freshmen in 2010 enrolled in two-year colleges in the SREB region and in the West — compared with 45 percent in the Midwest and 39 percent in the Northeast. More than half of all SREB region undergraduates attended two-year colleges in five states (Florida, Maryland, Mississippi, North Carolina and Texas). The same was true in seven Western states and two Midwestern states but no Northeastern states.

The split between public sector and nonpublic sector enrollment has been fairly stable over the past 40 years — with public college enrollment equaling 80 percent of the total in the SREB region in 1970 and again in 2010. The most striking change in distribution is the increase in public two-year college enrollment from 22 percent of the region's total in 1970 to 40 percent in 2010. With recent increases in enrollment in non-public two-year colleges, their share grew from 2 percent of the total in 1970 to 4 percent in 2010.

Distribution of College Enrollment, SREB States

- Private/Proprietary Two-Year Colleges
- Private/Proprietary Four-Year Colleges
- Public Two-Year Colleges
- Public Four-Year Colleges

Note: May not equal 100 percent due to rounding.

For more information about this bulletin or the *SREB Fact Book*, contact Joe Marks, director of Education Data Services, at (404) 875-9211 or joe.marks@sreb.org.

Figures represent enrollments in all two-year, degree-granting institutions eligible for federal Title IV student financial aid in the 50 states and the District of Columbia, excluding service schools.

In these states, numerous non-degree-granting institutes merged with degree-granting, two-year colleges or became degree-granting.

Enrollments in two-year colleges formerly embedded in and reported as four-year are now separate and reported as two-year. West Virginia figures include the numbers for American Public University (APU), an online-only, proprietary four-year university. APU accounted for 26 percent of the state's total enrollment in fall 2010 and thus is a major pull on West Viriginia trends. West Virginia University, the next largest university, accounted for 19 percent of the state's enrollment. APU first entered the West Virginia figures in fall 2007.

In prior years, Strayer University reported all of its campuses nationwide in the figures for the District of Columbia campus. Now District of Columbia figures represent only the District of Columbia campus.
