College Affordability Profile

October 2016

To support the work of the SREB's member states and its Commission on College Affordability, SREB commissioned the Higher Education Policy Institute to prepare a college affordability profile for each SREB state, as well as a synthesis of relevant trends in the SREB region. These profiles detail college affordability data and trends specific to the state to assist policymakers in assessing the dimensions of the affordability issue and the need for state policy initiatives or interventions.

In addition to this state profile, other affordability resources from SREB include:

- *Shared Responsibility for College Affordability*, the Commission's final report and executive summary
- *College Affordability: Trends in the SREB Region*
- *College Affordability: SREB Technical Report*
- *College Affordability Policy and Practice Review: A Statewide Framework*
- *College Affordability: Promising State Policies and Practices*
- *SREB Fact Book on Higher Education*

Each of these documents is available at [SREB.org/Affordability](https://www.sreb.org/Affordability).

A Closer Look at Family Ability to Pay

SREB's Commission on College Affordability defined *affordability* as the relationship of the price required to attend higher education — or the net price — relative to family income.

Net price = tuition and required fees plus room and board, minus grant aid students receive from the federal or state government or the institution.

Net Price as a Percentage of Income, Public Four-Year Category 1 Institutions, 2013
