

WEATHERING & EROSION

Station 11 More Chemical Weathering

Materials:

Steel wool Plastic bags White paper

What to do:

1. There are two bags containing steel wool.
2. One bag is labeled "dry." Nothing except steel wool has been placed in this bag.
3. One bag is labeled "wet." A small amount of water has been placed in this bag along with the steel wool.
4. Take a SMALL amount of steel wool out of each bag. Rub it between you fingers over the white paper.
5. Record your observations.
