

Student and Faculty Diversity

Alabama

Current College Faculty Do Not Reflect the Diversity of Their Students

Faculty diversity is not a new issue, but it is an important one. While the college student population has become increasingly diverse over the past decade, there are still far too few Black, Hispanic and American Indian or Alaskan Native faculty members.

General Population: 31.4% of Alabama's general population are Black, Hispanic, or American Indian or Alaskan Native

College Students: 30.5% of students at Alabama 2-year or technical colleges, public 4-year institutions, and private not-for-profit institutions are Black, Hispanic, or American Indian or Alaskan Native

Faculty: 17.3% of full and part-time faculty at Alabama 2-year or technical colleges, public 4-year institutions, and private not-for-profit institutions are Black, Hispanic, or American Indian or Alaskan Native

Source: SREB analysis of *Fact Book of Higher Education* data for Title-IV participating, degree-granting postsecondary institutions. Data for faculty and doctoral degree demographics is for 2017-18; data for undergraduate students is for fall 2017.

Research shows that racial and ethnic diversity has positive effects on the educational experiences and outcomes of students. A recent study found that Black students who enroll in STEM courses taught by Black instructors are more likely to persist in a STEM field after their first year. In addition, some scholars posit that minority faculty members can help recruit underrepresented students, helping to diversify institutions. When the diversity of the student body is reflected in the faculty, underrepresented students can feel more connected to their institutions and students from majority groups have increased opportunities to benefit from a broader representation of perspectives.

Representation in Alabama

At the 2-year and technical college, public 4-year and private 4-year levels in Alabama there is a representation gap between faculty and undergraduate students. While the students recently awarded doctoral degrees are more closely aligned with the demographics of the undergraduate student population, Black, Hispanic, and American Indian or Alaskan Native scholars remain largely underrepresented at the faculty level. Asian student and faculty demographics are not disaggregated here because they are not historically underrepresented in the faculty context, particularly in the STEM fields.

2-Year and Technical Colleges	Alabama				SREB Region			
	Black	Hispanic	American Indian or Alaskan Native	White	Black	Hispanic	American Indian or Alaskan Native	White
Faculty (full & part time)	18.5%	0.6%	0.5%	78.2%	14.1%	7.4%	0.7%	74.1%
Undergraduate students	26.7%	3.9%	0.9%	65.2%	20.2%	23.6%	0.8%	48.5%
Representation gap between faculty and students	-8.2%	-3.3%	-0.4%	+13.0%	-6.1%	-16.2%	-0.1%	+25.6%

Public 4-Year Institutions	Alabama				SREB Region			
	Black	Hispanic	American Indian or Alaskan Native	White	Black	Hispanic	American Indian or Alaskan Native	White
Doctoral degrees granted	14.4%	3.3%	1.6%	74.4%	12.3%	7.2%	0.5%	71.7%
Faculty (full & part time)	11.6%	1.9%	0.4%	77.6%	9.2%	5.1%	0.4%	74.9%
Undergraduate students	22.8%	3.6%	0.5%	68.2%	17.9%	16.1%	0.6%	55.9%
Representation gap between faculty and students	-11.2%	-1.7%	-0.1%	+9.4%	-8.7%	-11.0%	-0.2%	+19.0%

Private Not-for-Profit 4-Year Institutions	Alabama				SREB Region			
	Black	Hispanic	American Indian or Alaskan Native	White	Black	Hispanic	American Indian or Alaskan Native	White
Doctoral degrees granted	41.3%	0.0%	4.3%	52.2%	20.8%	9.9%	0.6%	60.7%
Faculty (full & part time)	29.6%	1.2%	0.4%	63.8%	10.4%	5.0%	0.4%	76.2%
Undergraduate students	50.1%	2.5%	0.4%	43.5%	22.0%	12.0%	0.6%	58.2%
Representation gap between faculty and students	-20.5%	-1.3%	0.0%	+20.3%	-11.6%	-7.0%	-0.2%	+18.0%
