

Moore County School Wins Outstanding School Award

Moore High School honored for outstanding implementation of powerful literacy and mathematics practices

July 9, 2018 — Moore High School in Moore, Oklahoma, won the Outstanding School Award from the Southern Regional Education Board. Principal Mike Coyle accepted the award at SREB's Sixth Annual College- and Career-Readiness Standards Networking Conference July 9 in Orlando, Florida.

The Outstanding School Award recognizes a school in which teachers and leaders incorporate SREB's powerful literacy and mathematics practices into the culture of the school.

SREB's powerful literacy practices empower teachers to build meaningful literacy-based, standards-aligned assignments and enable teachers to take ownership of their own professional growth to drive more powerful outcomes for their students. SREB's powerful mathematics practices provide teachers with instructional strategies that help them implement college- and career-readiness standards, engage students in a productive struggle, and build students' fluency of procedural skills while deepening their mathematical reasoning and understanding.

Since Moore High School's introduction to these powerful practices, there has been a clear change in school culture that now provides a strong literacy approach to instruction across the curricula and encourages students to engage in a productive struggle in mathematics.

SREB's College- and Career-Readiness Standards Networking Conference has energized thousands of teachers by creating a collaborative environment that builds teacher confidence and student learning through powerful literacy and math practices.

The Southern Regional Education Board works with states and educators to improve public education at every level, from early childhood through postsecondary education. Learn more about SREB at sreb.org.
