**CONCURRENT INTEREST SESSIONS**

*Designing a Course Syllabus for Maximum Student Learning (38)*  
Lee

A syllabus is not merely a place to list the time and place of your class, your office hours and course calendar. It is a contract between you and your students about what expectations you have of your students (and what expectations they should have of you). This session will cover the key components and provide specific examples of how to craft a syllabus that helps students learn from the first moment of your course. Time for Q & A on specific courses being taught (or planned) by participants will be allotted.

*Presiding: Sheila Witherspoon.* Adjunct Professor, New Jersey City University, Franklin Park, NJ

*Presenter: Katharine E. Stewart.* Associate Vice President for Academic Affairs and Learning Strategies, The University of North Carolina, Chapel Hill, NC

*Teaching Session I: Engaging the Millennial Student (07)*  
Rosslyn I

As we head toward the year 2020, the students who show up in our classrooms are changing. Many are “Millennials”: students born after 1980 who are technology natives and who view education as a product and themselves as consumers. To them, an instructor is merely one vehicle through which they receive the product. This session will present findings on Millennials, how they learn and what they expect of faculty. It also will recommend how to teach and work with them and compare them with other generations.

*Presiding and Presenter: Carolyn Gentle-Genitty.* Assistant Professor, Indiana University School of Social Work, Indianapolis, IN

*Faculty Session I: Recruiting and Retaining Students of Color (13)*

Identifying and Leveraging Your Sources of Power as a Catalyst for Effective Mentoring (52) Salon F

The traditional thought around power is that the mentor has it and uses it on behalf of the protégé. But the protégé also has some power. Dr. Blake-Beard will discuss several models of power and how power and mentoring are related. Participants will identify their sources of power though an interactive process and a case study will be used to see these concepts in action. The session will conclude with specific actions you can take to create better mentoring relationships.

Making Ethical Decisions in Higher Education as Faculty and Administrators (54)

The way to the top of the academic and administrative ladder is through ethical action and ethical decision-making. Failure to make ethical decisions is a sure “career stopper.” Every action that you take and every decision you make must pass public and private scrutiny. This session is designed to make the case for ethical decisions and to discuss case studies and contemporary examples of how non-conformity has derailed academic and administrative careers. Participation is a must for new faculty and those seeking administrative positions. Do not make these mistakes!

Faculty Session III: Recruiting and Retaining Faculty of Color (15)  Alexandria

Most academics are familiar with the concept of unconscious bias and how negative bias can shortchange those in disfavored societal groups. But we lack a concrete, detailed grasp of more than a dozen additional contaminants that can compromise the equity and effectiveness of search processes, personnel evaluations, and the mentoring and advancement of postdoctoral scholars and early-stage faculty. In this problem-based, interactive session, you will learn how to reduce or prevent the shortcuts and errors that often result in devaluation of women in male-dominated fields and of underrepresented U.S. minorities in all fields. Time will be devoted to retention and ways that brand-new faculty should be “frontloaded” by their department chairs and senior colleagues.
