27	The Institute always provides an important mix of both inspiration and practical guidance. While this is intended for students, there is also substantial benefit to those who serve as mentors. The Institute allows for the renewal of friendships among mentors, and the exchange of information regarding the most effective ways to serve students. Seeing student successes serves as a powerful stimulant to continue with this important work.	11/12/2019 6:52 PM

34	Because I have attended so often, I have gotten to know some of the scholars. This year I was able to reconnect with a young woman who had been very discouraged last year, and had a rough time since then. We had a fairly long talk, which ended with my telling her at the dinner that I would be back next year to see her up on stage. So as much as I enjoy providing information to the large group that attends my session, it is the ability to make these personal connections that makes the Institute extraordinary.	11/12/2019 4:20 PM
