College affordability continues to be a concern for students and their families in Texas, particularly those in lower income groups. This, along with declining birth rates and other factors, makes maintaining enrollment challenging for postsecondary institutions. Decreasing or stagnant enrollment will, in turn, make reaching state education attainment goals and improving students’ employment outcomes more difficult. This 2019 college affordability profile provides updated data on how affordable different types of public institutions are for Texas families at various income levels.

**Percentage of Average Family Income Required to Attend College Full Time**

In 2016-17, the percentage of family income required to pay for college in Texas was slightly lower than the SREB averages for four-year and two-year institutions.

Families in Texas paid a higher percentage of their family income in 2016-17 for a full-time student to attend four-year and two-year institutions than in 2011-12.

Families in Texas needed, on average, 30% of their income in 2016-17 to pay for educational expenses for a full-time student at four-year Type 1 institutions and 26% at four-year Type 2 institutions.

In 2016-17, Texas families needed to pay, on average, 16% of their income to cover educational expenses at two-year institutions.

*SREB College Affordability Profiles detail data and trends specific to each SREB state to assist policymakers with decisions on postsecondary affordability and attainment. For additional resources, including recommendations of the Commission on College Affordability in the South and the SREB Fact Book on Higher Education, visit https://www.sreb.org/AffordabilityProfiles.*
Distribution of Average Family Income

Data on cost of attendance are collected using five income categories. In Texas, students from families that made less than $30,000 accounted for the largest percentage of families in 2011 and families that made over $110,000 accounted for the largest percentage of families in 2016.

Percentage of Income Required for Tuition at Lowest-Priced Colleges for Families Making Less Than $30,000

The percentage of income required for tuition and fees at the lowest-priced public institutions remained stable from 2011-12 to 2016-17 for Texas families making less than $30,000.

For families making less than $30,000, the cost of tuition and fees at the lowest-priced public institutions averaged 9% of income in 2016-17, compared to 8% in 2011-12.

The percentage of income for Texas families making less than $30,000 was lower than the SREB and national averages in 2011-12 and 2016-17.

Net Price as a Percentage of Income, Public Four-Year Type 1 Institutions

Texas families in the lowest income category were the most affected by the increase in net price at four-year Type 1 institutions.

The increase in the percentage of income needed to pay for four-year Type 1 institutions in Texas was much larger for families making less than $30,000 than for any other income category.

Families making less than $30,000 in 2011 needed 45% of their income to pay for educational expenses. In 2016 it was 62%.

Families making over $110,000 only needed 10% of their income in 2011 and 11% in 2016 to cover expenses at these institutions.

Net Price as a Percentage of Income, Public Four-Year Type 2 Institutions

Texas families in the two lowest income categories were the most affected by the cost of attendance at four-year Type 2 institutions.

The increase in the percentage of income needed to pay for four-year Type 2 institutions in Texas was larger for families making $48,000 or less than for other income categories.

Families making less than $30,000 in 2011 needed 51% of their income to pay for educational expenses. In 2016 it was 53%.

Families making over $110,000 only needed 8% of their income in 2011 and 9% in 2016 to cover expenses at these institutions.

Net Price as a Percentage of Income, Public Two-Year Institutions

The percentage of income that Texas families needed to pay for educational expenses at two-year institutions remained stable from 2011 to 2016.

There was little or no change in the percentage of income needed to pay for two-year institutions in Texas for families in all income categories.

At Texas’s two-year institutions, families making less than $30,000 in 2011 needed 32% of their income to pay for educational expenses. In 2016 it was 33%.

Families making over $110,000 only needed 5% of their income in 2011 and 6% in 2016 to cover these expenses.

State Financial Aid Per Student

Texas awarded more need-based aid in 2016-17 per full-time-equivalent (FTE) student than the SREB and national averages. Need-based aid also increased from 2011-12 to 2016-17.

The state spent $321 on average per undergraduate FTE student on need-based aid in 2011-12 compared to $515 in 2016-17. The SREB average in 2016-17 was $351 and the national average was $382.

Texas spent $393, on average, per FTE for financial aid that had need and merit criteria in 2016-17, much more than the SREB average for need and merit-based aid of $137 and the national average of $225.

**Student Borrowing at Public Institutions**

In 2016-17, Texas graduates borrowed less than the national average to earn degrees at all public institutions.

Graduates who sought a degree or certificate from four-year Type 1 universities in Texas in 2016-17 borrowed, on average, $19,823 and graduates of four-year Type 2 institutions borrowed $19,095. These amounts were higher than average amounts borrowed in 2011-12, but lower than the SREB and national averages in 2016-17.

Students at public two-year colleges borrowed, on average, $8,329 in 2016-17, much more than the average amount in 2011-12 but less than the SREB and national averages in 2016-17.
Changes in Tuition and Fees, CPI, and Household Income

Compared to the Consumer Price Index and household income, tuition and fees at Texas public colleges and universities increased at a faster rate between 2006-07 and 2016-17.

Over that decade, the CPI increased by 19% and median household income in Texas increased by 30%, while tuition and fees increased by 69% at four-year institutions and 59% at two-year institutions.

State Appropriations vs. Tuition and Fees: Share of Funding

Operating expenses at Texas’s public four-year institutions consisted mostly of tuition and fees in 2016-17.

In 2016-17, net tuition and fees at Texas’s four-year institutions made up 55% of total funds available for operations of the state’s public institutions, while state appropriations supplied the remaining 45%. In comparison, state appropriations provided 51% in 2006-07. The shift in who pays for majority of operating expenses at public four-year institutions occurred after 2007-08.

Operational funds consisted increasingly of state appropriations for Texas’s public two-year institutions in 2016-17.

In 2016-17, state appropriations at Texas’s four-year institutions made up 75% of total funds available for operations of the state’s public institutions, while net tuition and fees supplied the remaining 25%. In comparison, state appropriations provided 71% in 2006-07.
Additional State Context

Postsecondary Enrollment. In 2016-17, 31% of students in Texas were enrolled in public four-year Type 1 institutions, 17% were enrolled at public four-year Type 2 institutions, and 51% were enrolled in public two-year colleges.

First-Year Retention. For the fall 2016 cohort, 90% of students attending public four-year Type 1 institutions in Texas were still enrolled one year later, 82% were retained after the first year in public four-year Type 2 institutions, and 68% were retained at public two-year colleges.

Pell Grants. In 2016-17, 18% of the average cost of attendance in public four-year Type 1 institutions in Texas was covered by the average Pell Grant award. The average grant amount covered 21% of costs in public four-year Type 2 institutions and 28% of costs in public two-year colleges.

Education Attainment. In 2017, 43% of Texas's working adult population between ages 25 and 64 had a postsecondary credential of value. The state’s educational attainment goal is to reach 60% by 2030.

Student Debt. In Texas, 56% of the class of 2018 graduated with debt, owing an average of $27,293.

Public Two-Year
Alvin Community College
Amarillo College
Angelina College
Type 1 four-year institutions award at least 30 doctoral degrees in five different areas. Type 2 includes all other four-year institutions. The public two-year category includes institutions that primarily award associate degrees; the list may include two-year institutions that award bachelor’s degrees. The technical college category includes postsecondary institutions that offer programs of less than two years duration below the baccalaureate level and occupational and vocational schools with programs that do not exceed 1800 contact hours. This profile does not report data for the technical college category if less than 3% of students are enrolled in this sector.

Institutions are listed as they were categorized in the 2016-17 Data Exchange Survey and if they submitted the data required for this profile.

This profile is based on data reported to IPEDS by institutions during the 2016-17 academic year. Some IPEDS surveys collect data for the prior academic year; for instance, the 2016-17 Student Financial Aid survey collected data for 2015-16.

Institutions or states may have updated data previously reported, or adjusted methodology to calculate a statistic. As a result, some data in the current profile may differ from data reported in past Affordability Profiles for the same time period.

See the technical guide at SREB.org/Affordability for detailed sources and explanatory notes.
