

Return on Your State's Investment

Alabama and The Doctoral Scholars Program

The SREB-State Doctoral Scholars Program is an excellent investment with clear returns for states and institutions. As states consider how to support student success and increase diversity, equity and inclusion in their states, funding for the Doctoral Scholars Program is a smart decision.

Reducing Time-to-Degree

- The median funded time-to-degree from program entrance for **Alabama DSP scholars** is **4.9 years**. According to the National Science Foundation's Survey of Earned Doctorates, the national median time-to-degree for all Ph.D. recipients is **5.8 years**.
- That reduced time-to-degree has saved **Alabama** approximately **\$4,000,000** over the past 28 years.
- A faster time-to-degree means students spend less time out of the workforce and become higher-income earners sooner. Given that the vast majority of doctoral candidates are state-supported, it also lessens the state's cost in tuition and fees for doctoral students.

Higher Wage Earners, More Tax Contributions

- Workers with a Ph.D. make, on average, **\$97,616** per year compared to the **\$64,896** that bachelor's degree recipients earn.
- Over a lifetime, a doctoral degree recipient makes an estimated **\$1,000,000** more than a bachelor's degree recipient.
- Given that **42 Alabama** DSP graduates are currently employed within the state of **Alabama**, that could add up to more than **\$40 million** in additional taxable income.

Alabama and The Doctoral Scholars Program

Building a Diverse Faculty

- **90%** of **Alabama** DSP graduates who are working in **Alabama** are employed in postsecondary education as faculty or administrators.
- An additional **51 Alabama** DSP graduates are working in states in the SREB region.
- **20** DSP graduates from other states work in **Alabama**.
- Assuming an average college course size of 35 students and an average faculty member course load of 3 courses, approximately 3,255 students are taught by **Alabama** DSP alumni each year. That's **32,550 students** over the next decade. And as students continue to grow more diverse, research shows it's important to have professors who look like them at the front of the classroom.

A Competitive Pool of Diverse Faculty Candidates

- The Doctoral Scholars Program also hosts the annual Institute on Teaching and Mentoring, the largest gathering of minority doctoral scholars in the country. The Institute has an average of about **1,000 attendees per year** and serves as a crucial connecting point for students and recruiters from higher education institutions.
- The DSP Scholar Directory showcases **almost 2,000 accomplished doctoral scholars and Ph.D. recipients** who are committed to pursuing careers in the professoriate — a key recruiting pool for higher education institutions. The directory includes vitae, profiles, research and scholarship areas and other information.
