## **Appendix A**

# **SREB-State Data Exchange**

## **Definitions of Institutional Categories**

## **and Listing of Public Four-Year Institutions,**

## **Two-Year Colleges, Technical Colleges**

## **and Technical Institutes**

Throughout its 49-year history, the SREB-State Data Exchange has recognized the importance of reporting comparative data by institutional category. States have very different mixes of institutional types; therefore, comparisons by institutional category can support the analysis of statewide aggregate data.

Designed to be used for interstate statistical comparisons, the SREB method groups postsecondary education institutions into categories based on their resource requirements. Factors used to determine requirements include size (number of degrees awarded and full-time-equivalent enrollment), role (types of degrees awarded), breadth of program offerings (number of program areas in which degrees are granted) and comprehensiveness (distribution of degrees across program areas). Other factors, such as cost differences among programs or externally-funded research, are not considered relevant to determining resource requirements.

The SREB-State Data Exchange recognizes that methods of grouping institutions may serve different purposes. For example, in funding formulas for colleges and universities, states take additional characteristics into account in forming comparison groups. The SREB-State Data Exchange assists states in analyzing groups across states by making the institution-level data from its survey available on SREB's website. In addition, many SREB publications report results using the categories listed in this appendix.

For most four-year institutions, category assignments are based on program completion data from the previous academic year. For two-year colleges, technical colleges and technical institutes, SREB uses the estimated full-time-equivalent enrollment data for the current academic year. The classifications reported here are from the 2017-18 SREB-State Data Exchange and are based upon 2016-17 program completion data and 2017-18 estimated full-time-equivalent enrollments.

Before it can be reclassified into a different category, an institution must meet the criteria of that category for three consecutive years.
