South Carolina School Named Outstanding Technology Center Site

*July 12, 2017* — Anderson Districts I & II Career and Technology Center in Williamston, South Carolina, was named an Outstanding Technology Center by the Southern Regional Education Board at the 31st Annual High Schools That Work Staff Development Conference in Nashville, Tennessee, on July 12.

ACTC has successfully implemented the Technology Centers That Work framework through project-based learning, engaging business and industry, setting high-expectations for all students and creating student-centered classrooms. The center has embraced the integration of academics into career and technical education, and its teachers have participated in project-based learning training and collaborated on developing authentic, real-world projects. All seniors are required to create a culminating project that aligns with their program of study.

SREB’s Technology Centers That Work program unites centers, home high schools and postsecondary institutions around career pathways that give students a head start on high-demand credentials or degrees. The High Schools That Work Staff Development Conference brings together educators from schools that have implemented instructional strategies of SREB school improvement programs.

*The Southern Regional Education Board works with states and educators to improve public education at every level, from early childhood through postsecondary education.*
