

Rising in Leadership: CTE, CCR and Making High School Matter

James R. Stone III
University of Louisville
National Research Center for
CTE

A leader has imagination & vision

- Has a Vision:
 - *It usually comes down to a few fundamentals. Vision is always one of them. Great leaders give real thought to the values, ideas and activities they're most passionate about--and those are the things they pursue...* (John Ryan quoted in Forbes, 2009)
- Has Information and Knowledge to Move that Vision Forward.
 - *Good performance within a company is the result of correct interaction of business management with its internal and external environment* (Houben & VanHoff, 1999).

A vision for

- A 21st Century Curriculum that
 - engages students,
 - let's them achieve the skills necessary for productive adulthood
 - Facilitates their transition to further education and work
- Supported by evidence-based pedagogy
- Nested in Programs that link all key players
- Lead by you

Here is what I will plan to do . . .

- Challenge assumptions about the emerging workplace
- Challenge assumptions about education “reform”
- Provide you information on:
 - What “average” CTE can do
 - What “high quality” CTE can do
 - What College and Career Ready requires
 - How College & Career Ready without CTE is _____
- Take notes, there will be a test

Caution: Assumption Challenges Ahead

College and Career Readiness

- More math and Science
- Requiring more academics will raise the bar on academic achievement

The Emergent Workplace

- We don't have enough scientists & engineers
- All the good jobs require "college"
- All the good jobs are STEM
- The only jobs being outsourced are routine factory jobs and low skilled jobs

Rigor= More

A narrow curriculum

High school has become the new middle school

**THIRTY YEARS OF COLLEGE
FOR ALL “REFORM”**

What does it take to obtain good jobs (Myth or Reality)?

Research by American Diploma Project indicates that regardless if students go on to college or into the workforce after graduation, they still need the same knowledge and skills, particularly in English and mathematics. At a minimum, high school course requirements need to cover four years of rigorous English and four years of math, including Algebra I, Geometry, Algebra II, and data analysis and statistics.

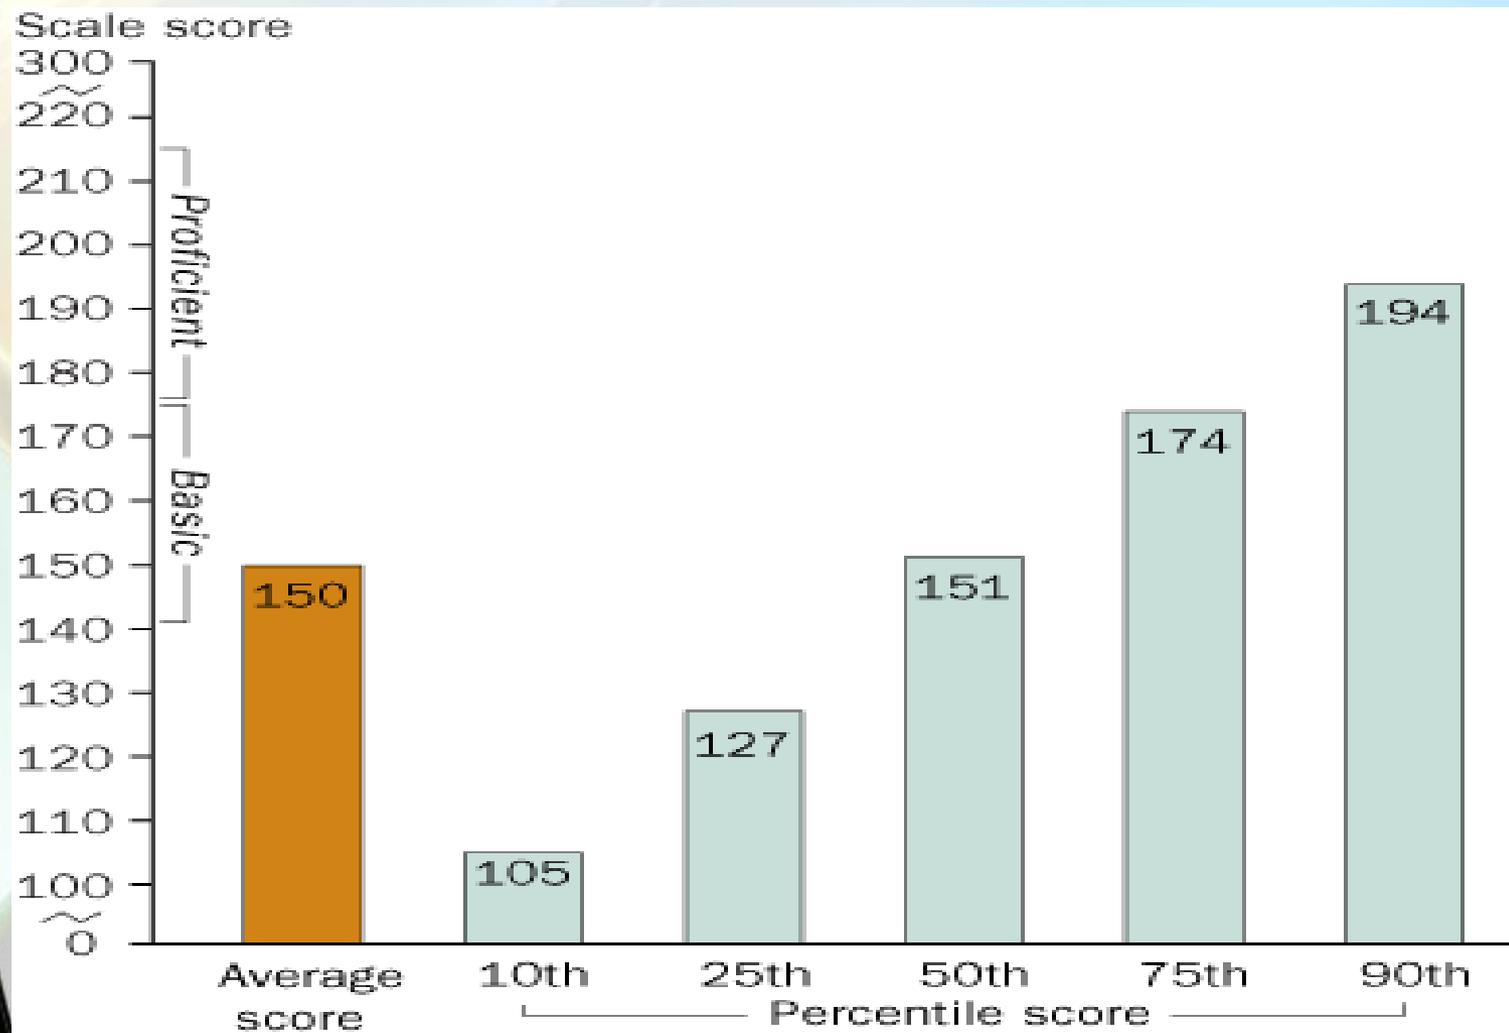

The 4x4 approach

Since the mid-1980s we have

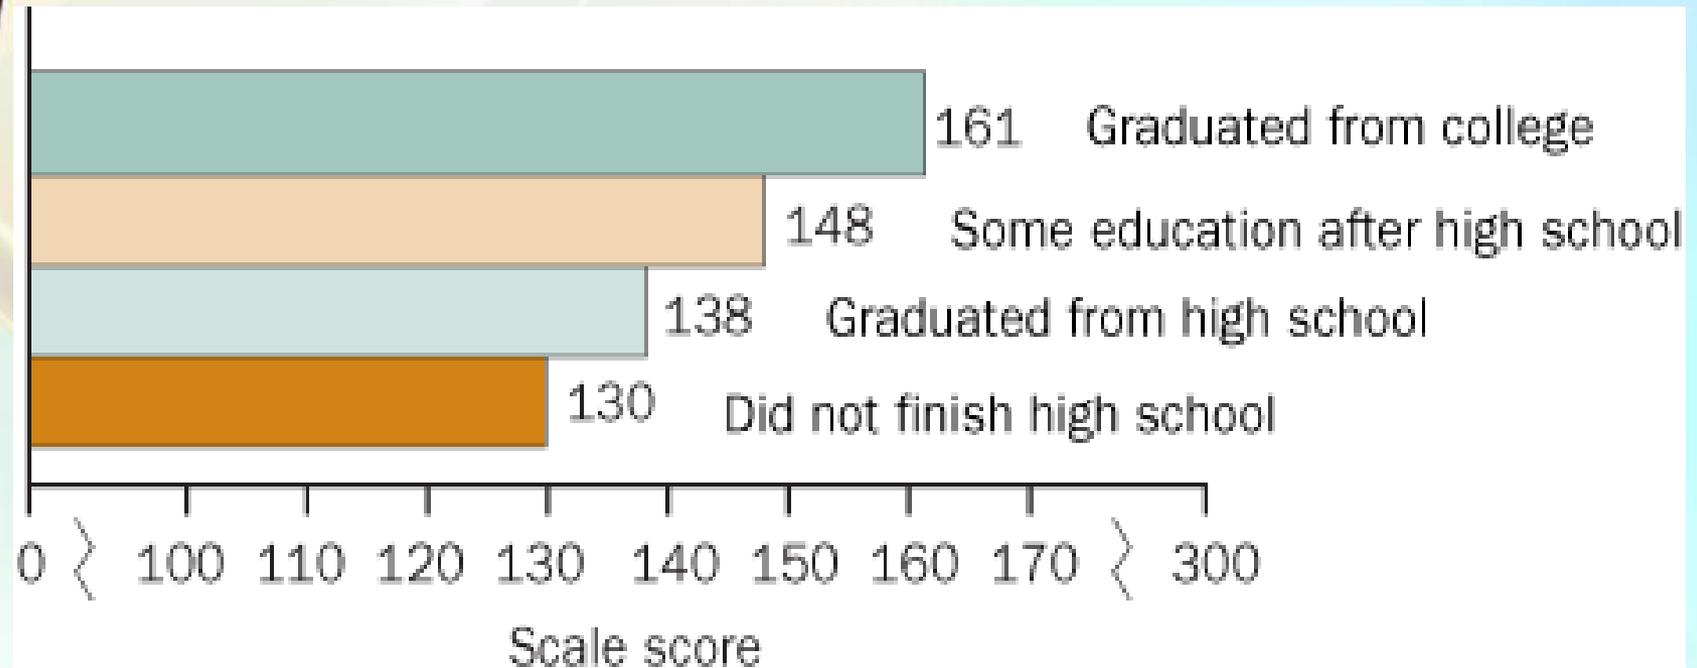

Added the equivalent of *one full year* of core academics (math, science, language arts) to high school graduation requirements.

- ▾ (NAEP) ***Reading scores have significantly declined***
- ▾ (NAEP) ***Science scores have significantly declined***
- ▾ (NAEP) ***math scores have remained relatively unchanged***

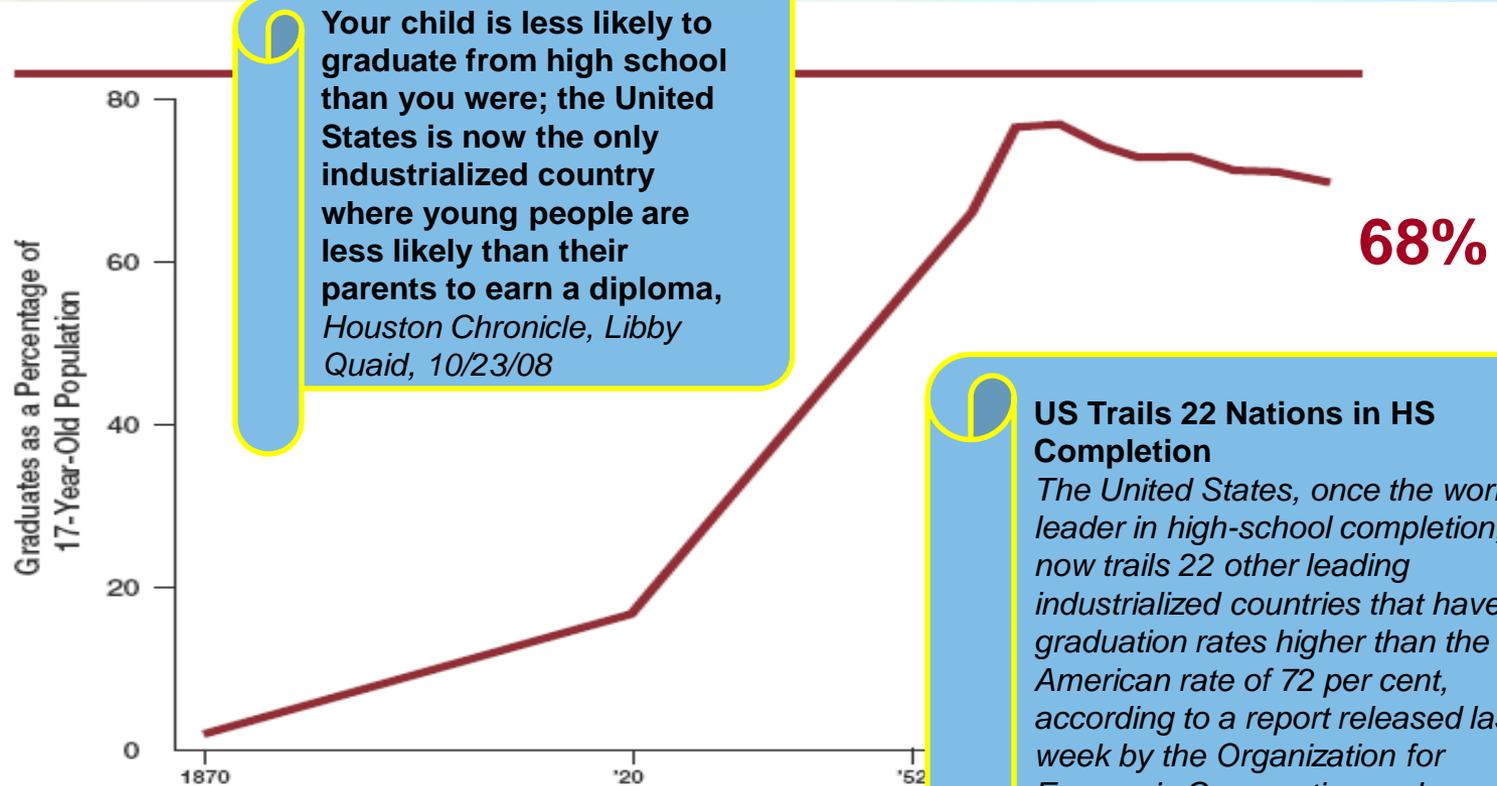

12th Grade Math Scores 2005

One solution?

It is getting worse

Your child is less likely to graduate from high school than you were; the United States is now the only industrialized country where young people are less likely than their parents to earn a diploma, *Houston Chronicle, Libby Quaid, 10/23/08*

US Trails 22 Nations in HS Completion

The United States, once the world leader in high-school completion, now trails 22 other leading industrialized countries that have graduation rates higher than the American rate of 72 per cent, according to a report released last week by the Organization for Economic Cooperation and Development.

Chronicle of Higher Education (December 4, 2008)

Source: *One-Third of a Nation* (ETS, 2005)

The College & Career Dilemma

9th Grade Cohort

- ▼ 100 enter 9th grade*
- ▼ 70 complete HS
- ▼ 43 Start college

Benchmarks

- ▼ 70% complete HS¹
- ▼ 62% start college immediately²
- ▼ 47% drop out (31% with 0 credits)
- ▼ 57% complete within 6 years³

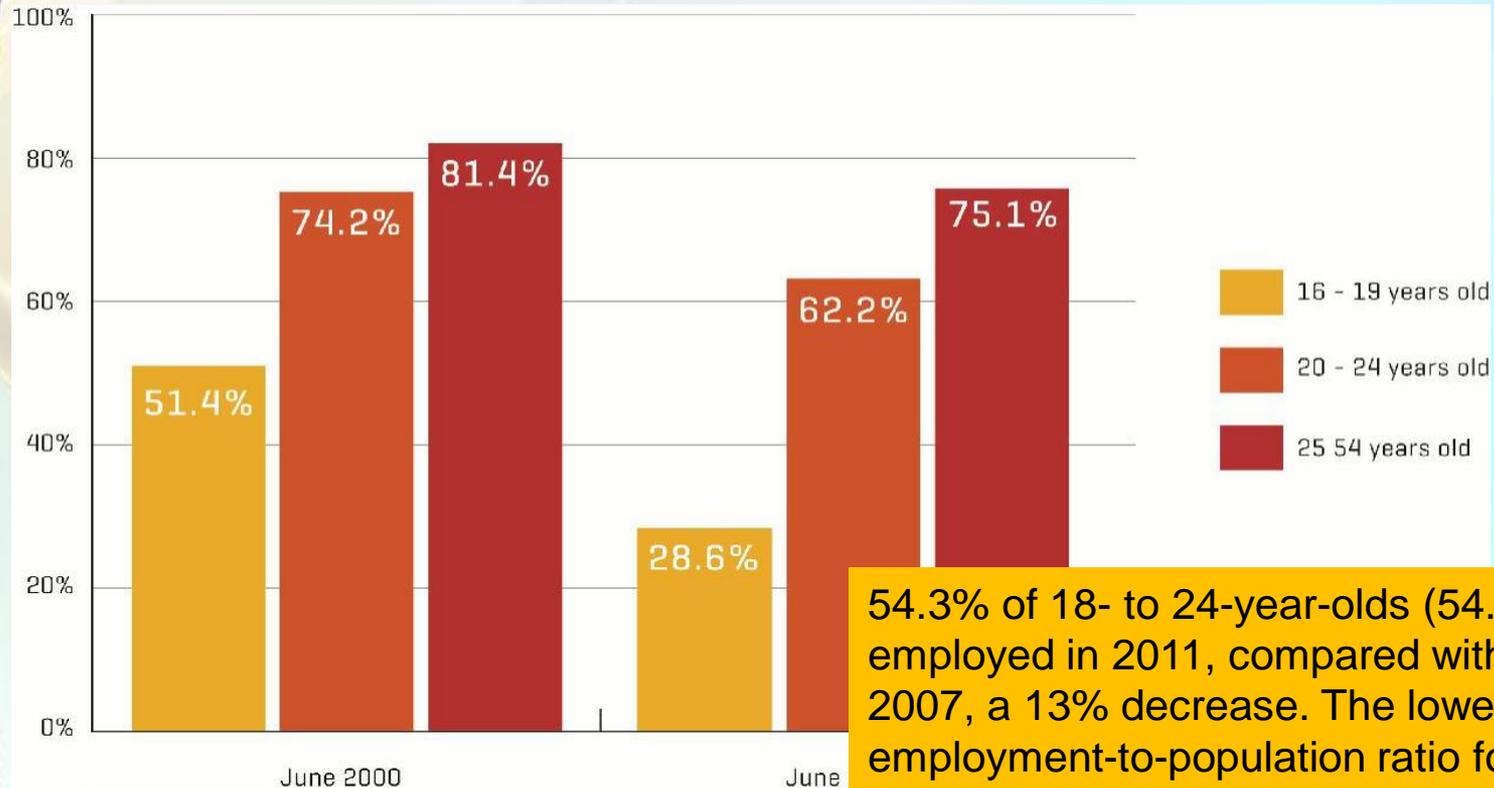

Workforce Credentials

- 30% enter as HS drop outs
- 25% enter as HS grad
- 19% enter with some college & a lot of debt
- 18-24% enter with college degree (6/4;3/2)

1. Greene et al, 2006
2. NCHEMS, 2009 (2006)
3. NCES, 2010

*An unknown number of pre-9th graders never make it to high school

Teens and Young Adults have been hit the hardest by the Great Recession

54.3% of 18- to 24-year-olds (54.3%) were employed in 2011, compared with 62.4% in 2007, a 13% decrease. The lowest employment-to-population ratio for young adults since 1948.

Source: Center for Labor Market Studies; U.S. Bureau of Labor Statistics, "CPS Labor Force Statistics".

Why is this important?

- ▾ Lower lifetime earning
- ▾ Increased risk they will never engage in sustained full-time employment
- ▾ 6.1 million NEETs in the U.S. = \$100 billion annual cost to U.S. taxpayers
- ▾ There are the social & emotional costs that are beyond dollars
- ▾ Higher risk of social conflict...look to Spain

Aligning Education and Labor Market Needs

**COLLEGE & CAREER READY
FOR ALL?**

Defining College & Career Ready

- ▾ Whatever skills needed to succeed in credit bearing CC courses (Tucker, NCEE)
- ▾ Being ready for college means that a high school graduate has the knowledge and skills necessary to qualify for and succeed in entry-level, credit-bearing college courses without the need for remedial coursework. (Achieve Inc)
- ▾ 4 years of math, English; 3 years of science & social science (College Board)
- ▾ Skills needed for living-wage, entry level jobs are same as skill needed to succeed in college (ADP)

Another perspective

- ▣ No support ... that those not going to college need to be qualified to enter college credit courses in order to enter the workforce.
- ▣ Becoming qualified for college-level classes or for entering a job directly out of high school is not the sole purpose of a high school education, e.g. preparing citizens to participate in a democracy.

Barton, P (ETS, 2006)

Too Many College Grads?

- ↘ ...turning out vastly more college graduates than there are jobs in the relatively high-paying managerial, technical and professional occupations to which most college graduates traditionally have gravitated.
- ↘ Roughly one of three college graduates is in jobs the BLS says require less than a bachelor's degree.
- ↘ College graduates, on average, are smarter and more disciplined and dependable than high-school graduates—so much of the reported earnings differential has little to do with college learning.
- ↘ We have engaged in massive and costly credential inflation to certify competency for jobs.

Not Enough College Grads?

By 2020, our research projects that the United States may have 1.5 million too few workers with college or graduate degrees and 6 million more without a high school diploma than employers will demand. McKinsey

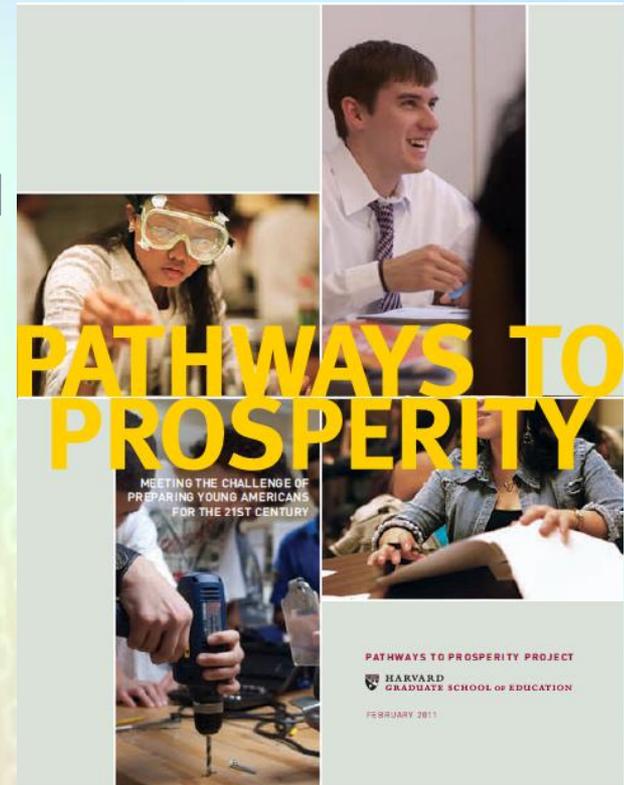

Global Institute, 2012

College Degree: At What Cost?

According to the Public Interest Research Group's Higher Education Project, 39 percent of new graduates with loans carry an "unmanageable debt,"

Two New Reports

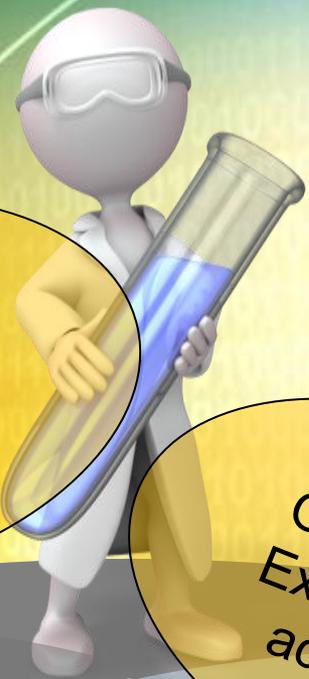

Career & College Ready

College & Career Ready for the 21st Century

Academic
Mathematics
Science
Communications

Technical
Job specific skills
valued by
employers

CTE =
Occupational
Expression of
academics

CTE =
Occupational
Expression of
academics

**College & Career
Ready**

Occupational
SCANS
21st Century Skills
"Soft" Skills
Employability Skills

Required skills

Two Key Questions for CCR:

- 1. What is the appropriate mix of academic, occupational and technical skills required for the emerging labor market?**
- 2. How can schools help students develop these skills?**

To be college ready: What college, what skills?

Academic

Mathematics
Science
Communications

1. Framework
2. Where skills are learned

↘ Trade/Technical School?

↘ Apprenticeship?

↘ Community College?

- Certificate? Diploma? Degree-Selective or not?
- Nursing
- Allied health
- Law enforcement
- Engineering technology
- Computer technology
- Cut scores?

↘ Baccalaureate College?

- MN College Readiness Benchmarks set by ACT: an 18 in English, 22 in Math, 21 in Reading, and 24 in Science.
- Only 32% of Minnesota's 2009 ACT-tested graduates met all four

What Occupational Skills!!!!

↓ (AKA Employability Skills)

↓ Frameworks: SCANS,
21st Century Skills

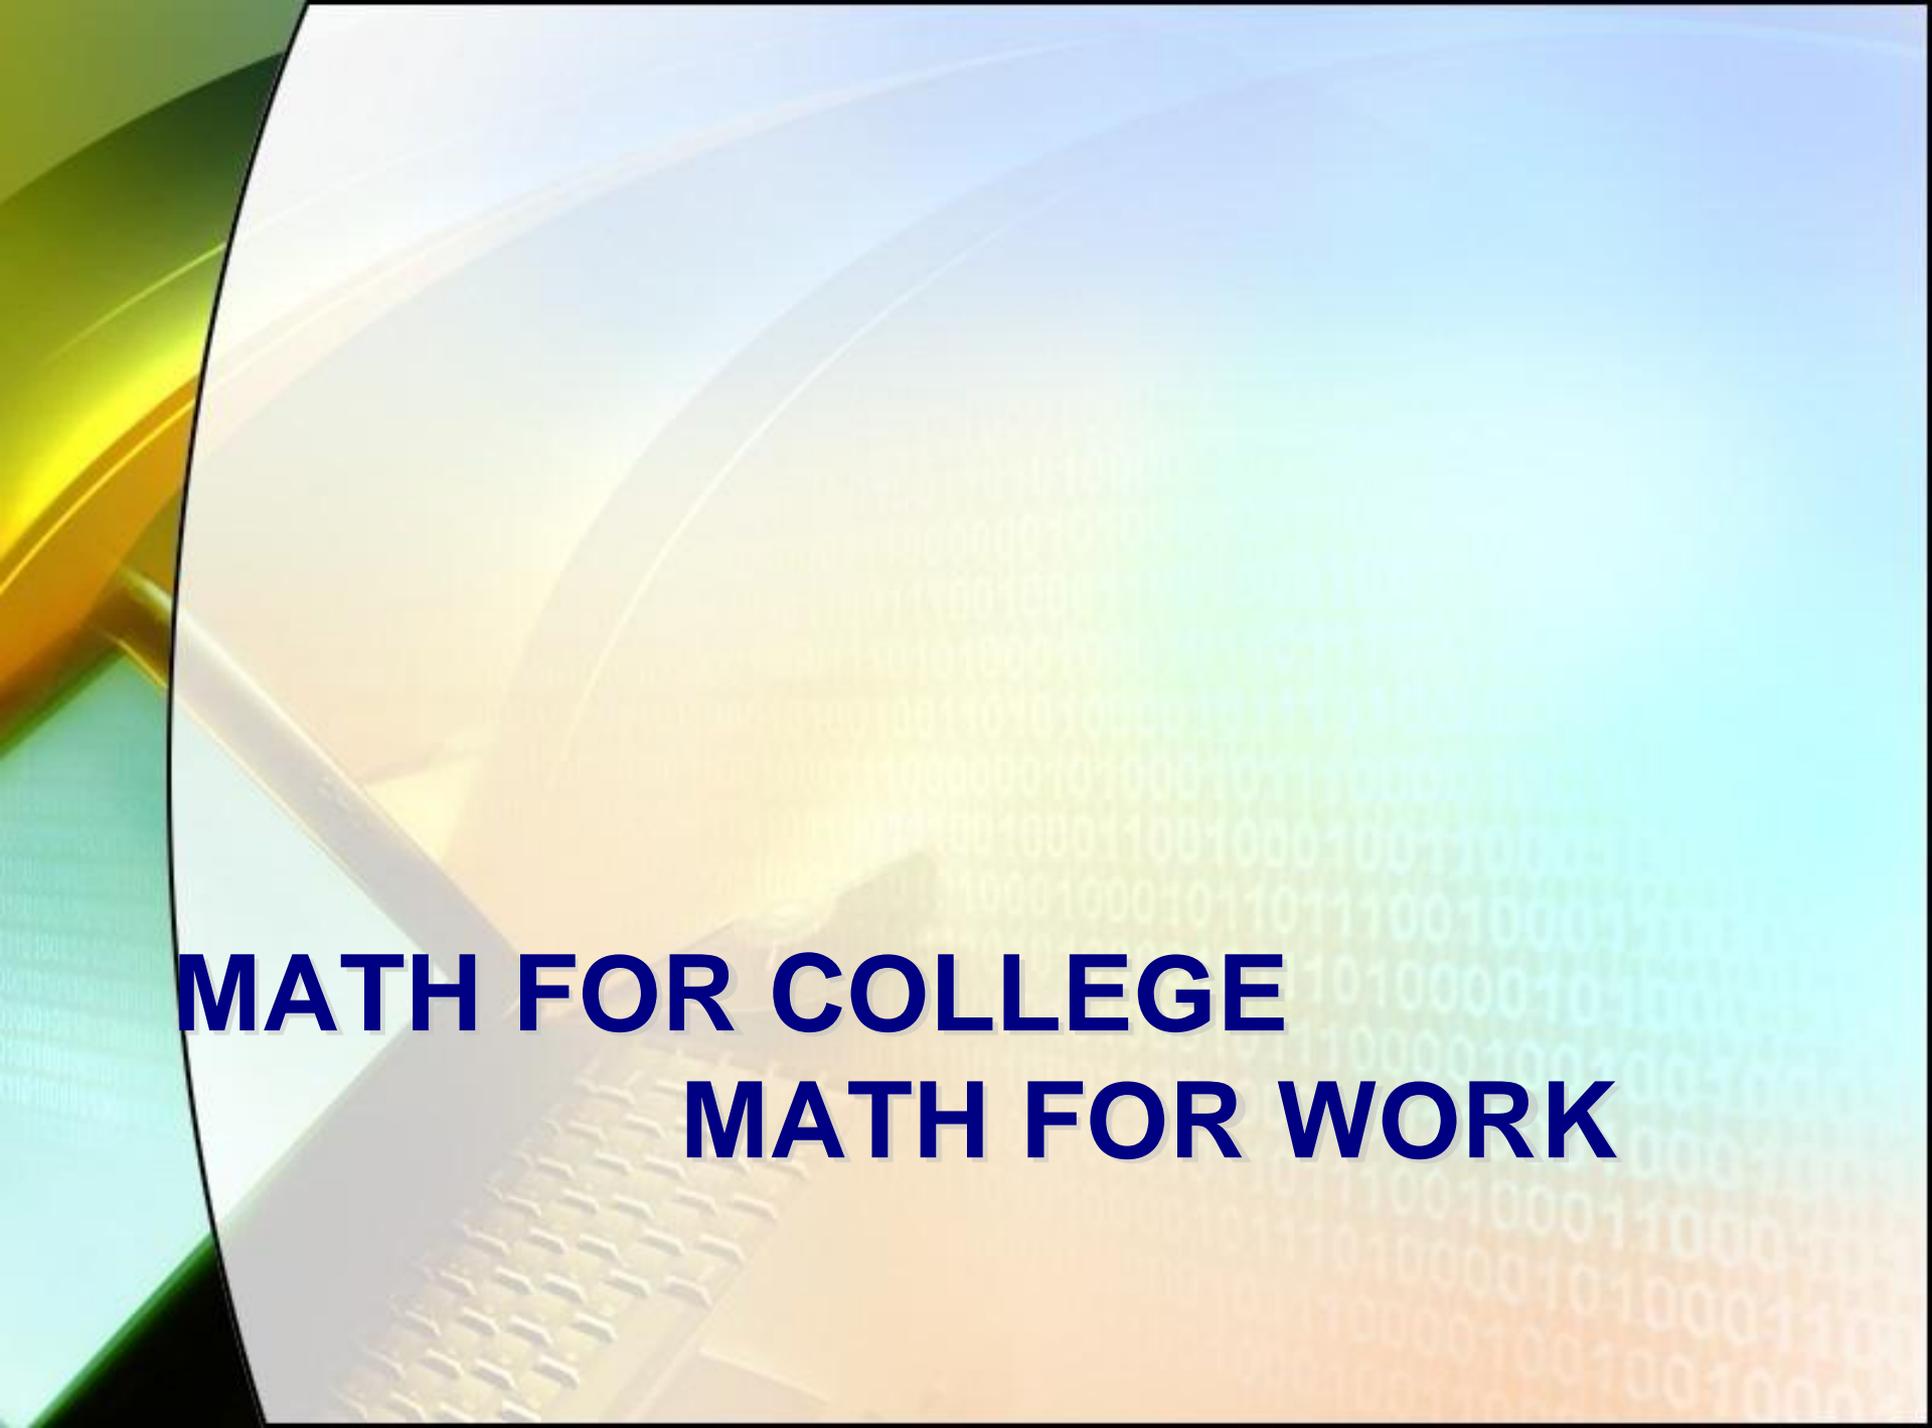

- ↓ *Critical thinking
- ↓ *Teamwork/ collaboration
- ↓ *Problem solving
- ↓ *Creativity
- ↓ *Technology-information application
- ↓ Oral & written communication skills
- ↓ Responsibility
- ↓ Professionalism
- ↓ Ethics
- ↓ Systems knowledge

What technical skills

- ▣ Immediate specific job skills*
- ▣ Industry certifications
- ▣ 132 available through HS programs (n=14 states)

* Learning for jobs (OECD)

The background features a gradient from light blue to yellow, overlaid with faint binary code (0s and 1s) and a semi-transparent image of a computer keyboard. On the left side, there are curved, overlapping shapes in shades of green and yellow, resembling a stylized graphic element or a portion of a screen.

MATH FOR COLLEGE
MATH FOR WORK

College Ready (ACT) Math=22

ACT Score	Class	Common Core	ACT Topic/ Task
13-15	Alg. I	HS	Simplify ratios
16-19	Alg. I Alg. I	8th HS	Add, subtract, multiply, and divide rational numbers Use rational numbers to demonstrate knowledge of additive and multiplicative inverses

ACT Score	Class	Common Core	ACT Topic/ Task
20-23	Alg I	8 th	Set up and solve problems following the correct order of operations with rational numbers
	Alg I	8 th	Give the domain and range of relations and functions
	Alg I	8 th	Evaluate functions at given values
	Alg I	HS	Apply algebraic properties to simplify algebraic expressions
	Alg I	HS	Translate real-world problems into expressions using variables to represent values
	Alg I	HS	Identify the effect on mean, median, mode, and range when a set of data is changed
	Alg I	8 th	Find the probability of a simple event
	Geo	HS	Identify corresponding, same-side interior, same-side exterior, alternate interior, and alternate exterior angle pairs formed by a pair of parallel lines and a transversal and use these special angle pairs to solve problems (e.g., solve equations, use in proofs)
	Geo	HS	Use construction techniques, including straight edge and compass, to bisect and trisect segments and to create parallel and perpendicular lines, perpendicular bisectors, and angle bisectors

Taking more math is no guarantee

- Only 13% of students who took Alg I, II & Geometry scored a 22 on the ACT exam¹
- Adding Trig increases to 37%¹
- 43% of ACT-tested Class of 2005¹ who earned A or B grades in Algebra II did not meet ACT College Readiness Benchmarks in math² (75% chance of earning a C or better; 50% chance of earning a B or better in college math)

1. ACT, Inc (2004) *Crisis at the Core*

2. ACT, Inc. (2007) *Rigor at Risk*.

College Ready Math: Liberal Arts Majors' Math Requirements

- ↘ Rutgers
 - ↘ One course in college-level mathematics.
- ↘ University of Minnesota
 - ↘ One course, (Mathematical Thinking)
- ↘ UC-Berkeley
 - ↘ Test out (basic understanding and competency in math, statistics, or computer science) or 2-unit course.

Course/ Common Core	ACT Topic	ACT Score
Alg I CC 8th	Add, subtract, multiply, and divide rational numbers, including integers, fractions, and decimals, without calculators	(16-19)
Alg I CC 8 th HS	Use properties of exponents (including zero and negative exponents) to evaluate and simplify expressions	(28-32)
Alg I CC 8th	Find rational number square roots (without calculators) and approximate irrational square roots (with and without calculators)	(24-27)
Alg I CC 8th	Evaluate and simplify radical expressions	(24-27)
Alg I CC 8th	Use scientific notation when working with very large or very small quantities	(24-27)
Alg I CC 8th	Set up and solve problems following the correct order of operations (including proportions, percent, and absolute value) with rational numbers (integers, fractions, decimals)	(20-23)
Alg I CC 8th	Identify, formulate, and obtain solutions to problems involving direct and inverse variation	(24-27)
Alg I CC 8th	Recognize the concept of slope as a rate of change and determine the slope when given the equation of a line in standard form or slope-intercept form, the graph of a line, two points, or a verbal description	(24-27)
Alg I CC 8th	Translate between different representations of relations and functions: graphs, equations, sets of ordered pairs, verbal descriptions, and tables	(24-27)
Alg I CC 8th	Interpret data from line, bar, and circle graphs, histograms, scatterplots, box-and-whisker plots, stem-and-leaf plots, and frequency tables to draw inferences and make predictions	(28-32)
Alg I CC HS	Simplify ratios	(13-15)
Alg I CC HS	Solve formulas for a specified variable	(24-27)
Geo CC HS	Apply relationships between perimeters of similar figures, areas of similar figures, and volumes of similar figures, in terms of scale factor, to solve mathematical and real-world problems	(28-32)
Geo CC HS	Use cross sections of prisms, cylinders, pyramids, and cones to solve volume problems	(28-32)
Geo CC HS	Find the lateral area, surface area, and volume of prisms, cylinders, cones, and pyramids in mathematical and real-world settings	(28-32)
Geo CC HS	Find the surface area and volume of a sphere in mathematical and real-world settings	(28-32)

Career Ready Math Skills: Getting the job*

Algebra I	Telecommunication Junior Technician
	Nursing
	HVAC
	Survey Technician
	Plumbing
Geometry	Survey Technician
	Plumbing
	Automobile Technician
	Nursing
	HVAC
Algebra II	Telecommunication Junior Technician

Applied Assessment

Level 5 math:

- Decide info needed
- Look up formula and perform single step conversions
- Calculate used mixed units
- Divide negative numbers
- Use one and two step calculations
- Calculate perimeters and areas of basic shapes
- Calculate % discounts

THE LABOR MARKET: ASSUMPTIONS & REALITIES

Urban Myths Driving Education Reform

- ▾ ***India & China are producing more engineers than U.S.***

US=222,000; India=215,000; China=352,000*

- ▾ ***We are not graduating enough engineers***
S&E wages have actually declined in real terms and unemployment rates have increased**

* Duke University Study, 2006; **Rand, 2006;

More Rhetoric...

- ▾ If trends in U.S. research and education continue, our nation will squander its economic leadership, and the result will be a lower standard of living for the American people.... By 2015 [the country needs to] **double** the number of bachelor's degrees awarded annually to U.S. students in **science, math, and engineering**. (National Summit on Competitiveness 2005)
- ▾ The United States faces an unprecedented challenge to its long-term global economic leadership. And a fall from leadership would threaten the security of the nation and the prosperity of its citizens.... **High school students in the U.S. perform well below those in other industrialized nations in the fields of mathematics and science** ... [and thus we need to make] STEM education a national priority. (Council on Competitiveness 2004).

More STEM or . . .

- ▾ S&E occupations make up only about one-twentieth (**5%**) of all workers (**5.3%**) in 2018 Urban Institute, 2007; (**6%**) in 2018, Carnevale, 2010.
- ▾ **435,000** U.S. citizens and permanent residents **a year** graduated with bachelor's, master's, and doctoral degrees in science and engineering. Over the same period, there were about **150,000** jobs added **annually** to the science and engineering workforce. .

http://www.businessweek.com/print/smallbiz/content/oct2007/sb20071025_827398.htm

Murray said that none of the companies she has talked with has suggested that there is a shortage of qualified chemists or life scientists. She said that ***employers' greatest concern "is not numbers, it is training."*** She cited the example of managers who told her they could interview hundreds of candidates for an organic chemistry position but wish they knew how to identify those candidates who ***"can behave collaboratively"*** and have the other broad competencies discussed at the workshop. She argued that the degree to which scientists have these other capabilities "really seems to be the problem."

IS THERE A SHORTAGE OF SCIENTISTS?

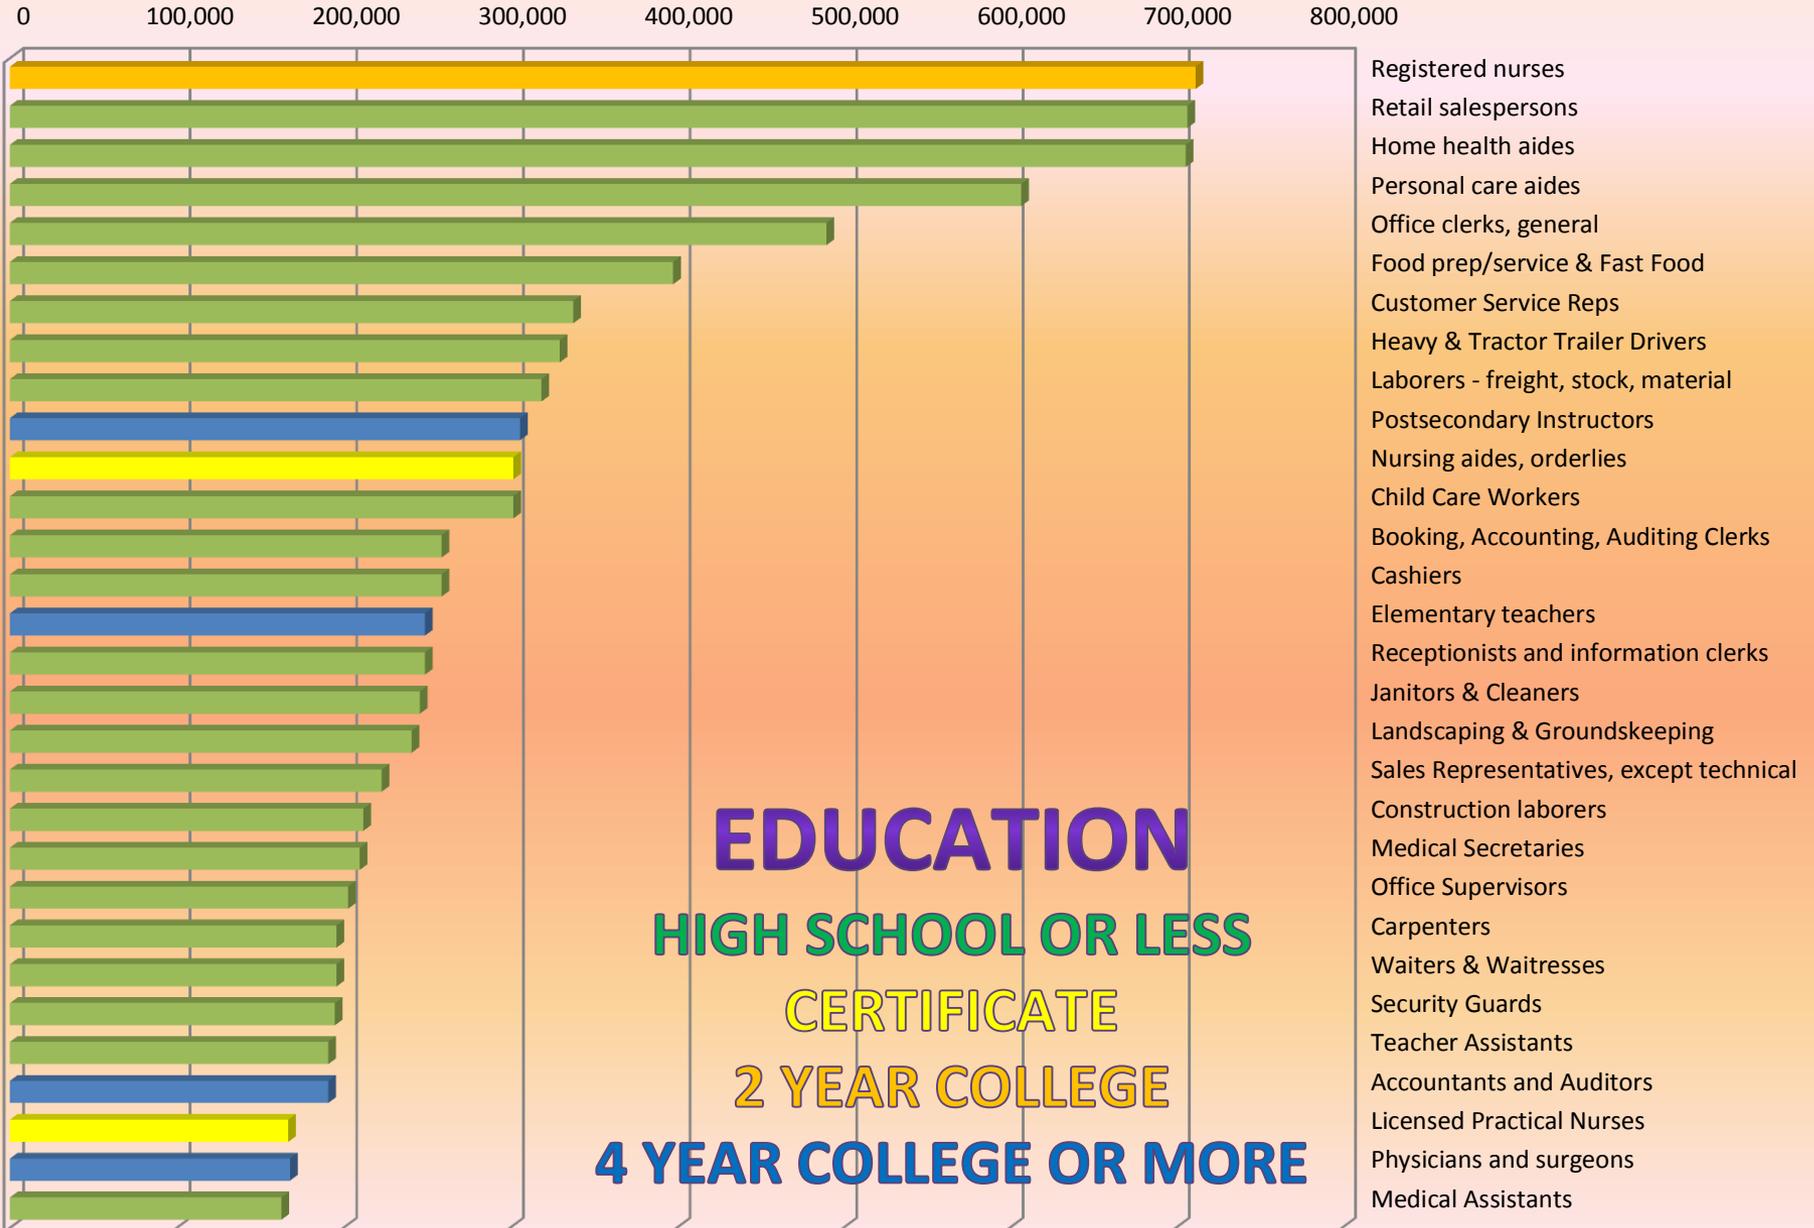

National Research Council. (2008). Research on Future Skill Demands: A Workshop Summary. Margaret Hilton, Rapporteur. Center for Education, Division of Behavioral and Social Sciences and Education. Washington, DC: The National Academies Press.

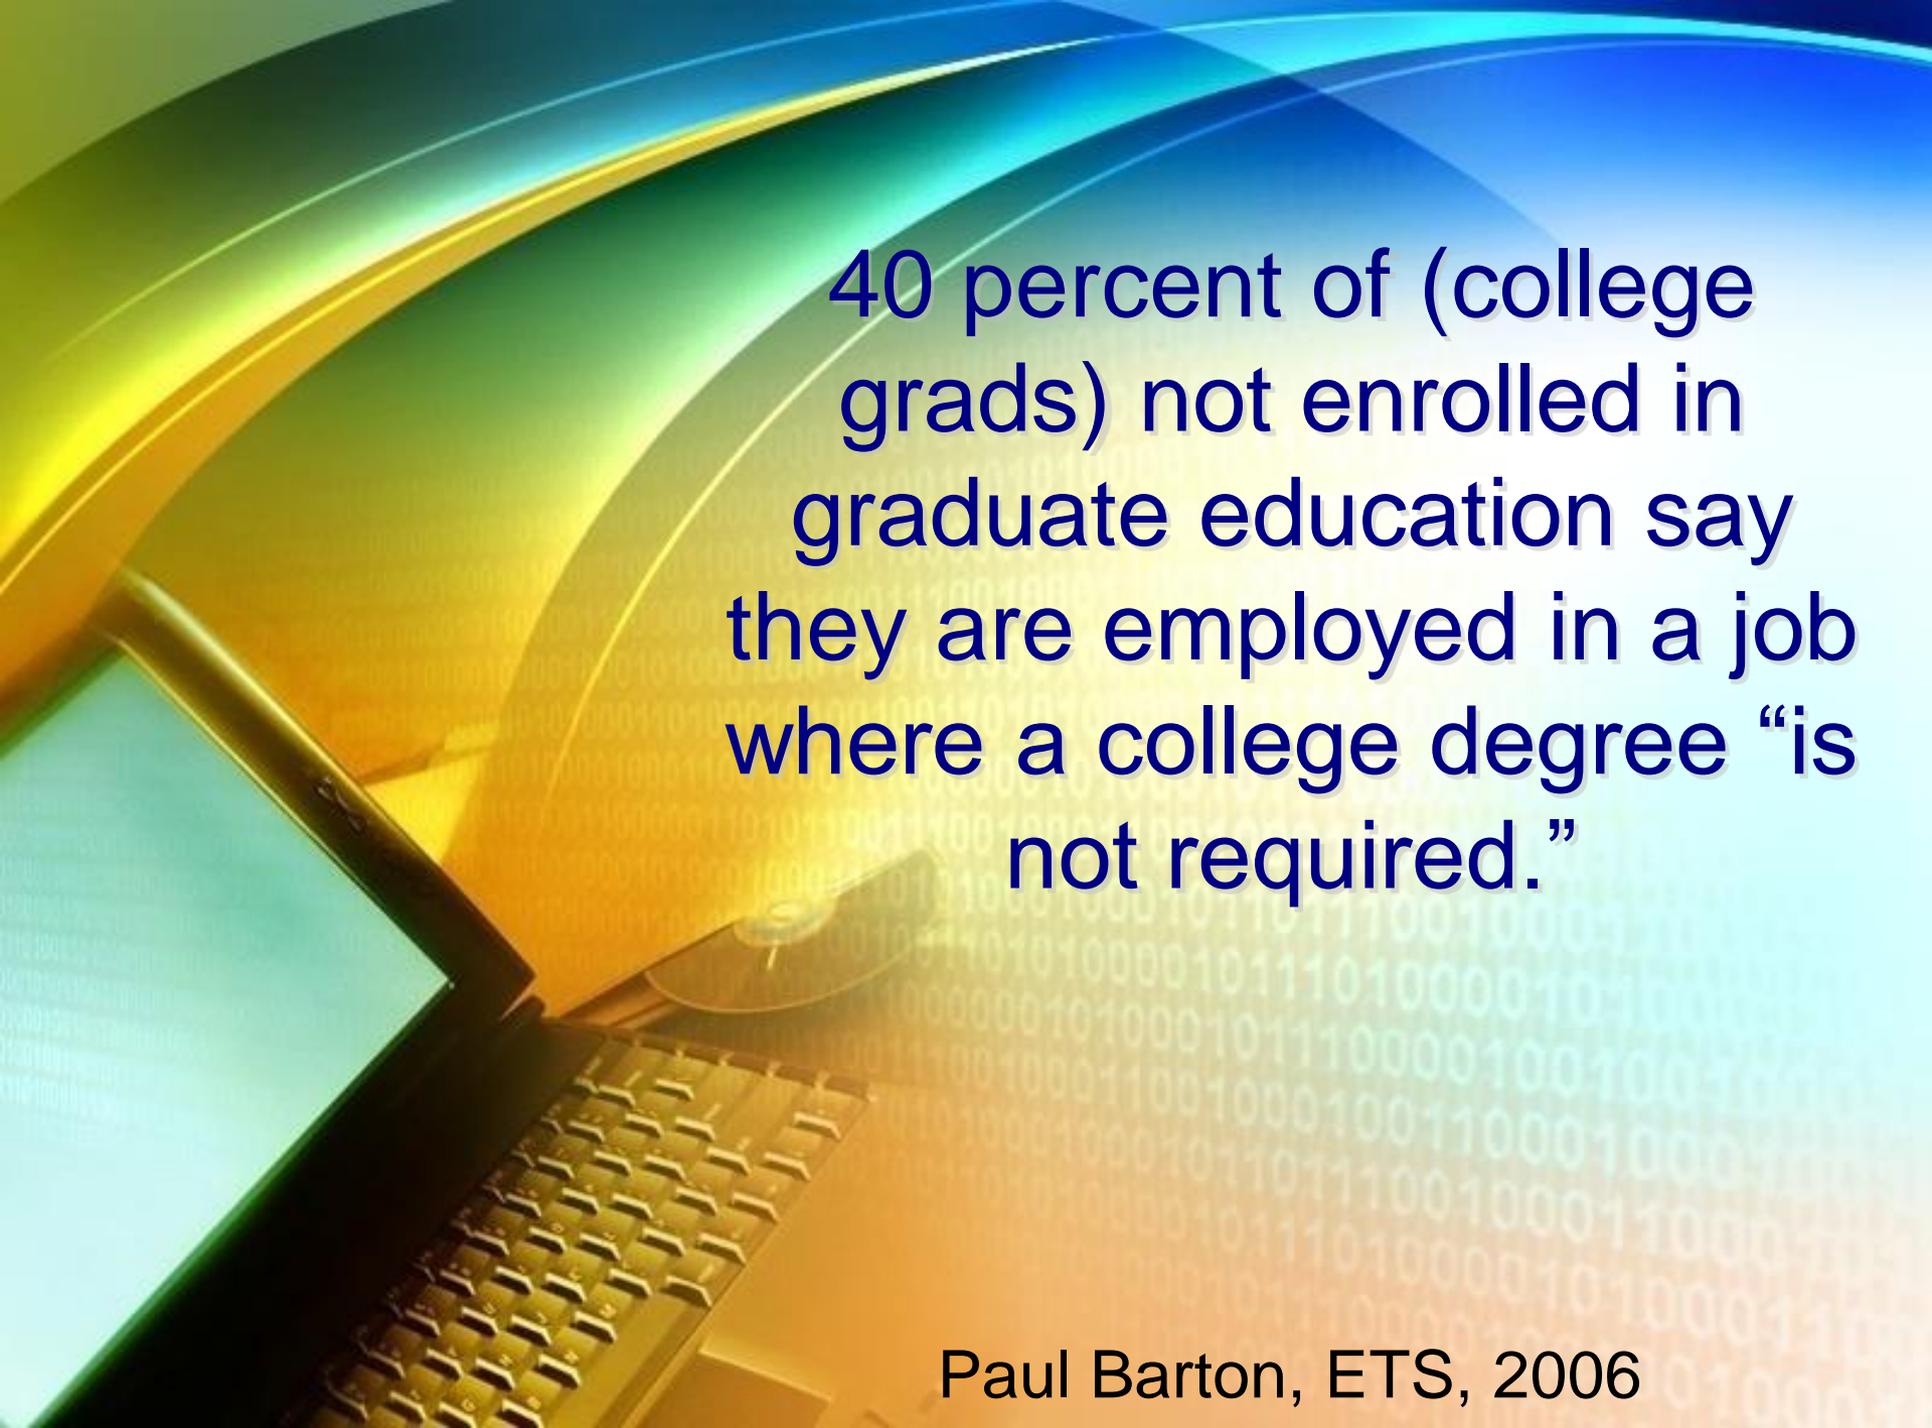

Three contested views of the future

THE EMERGING WORLD OF WORK

High Demand Occupations 2010-2020

The BLS Perspective

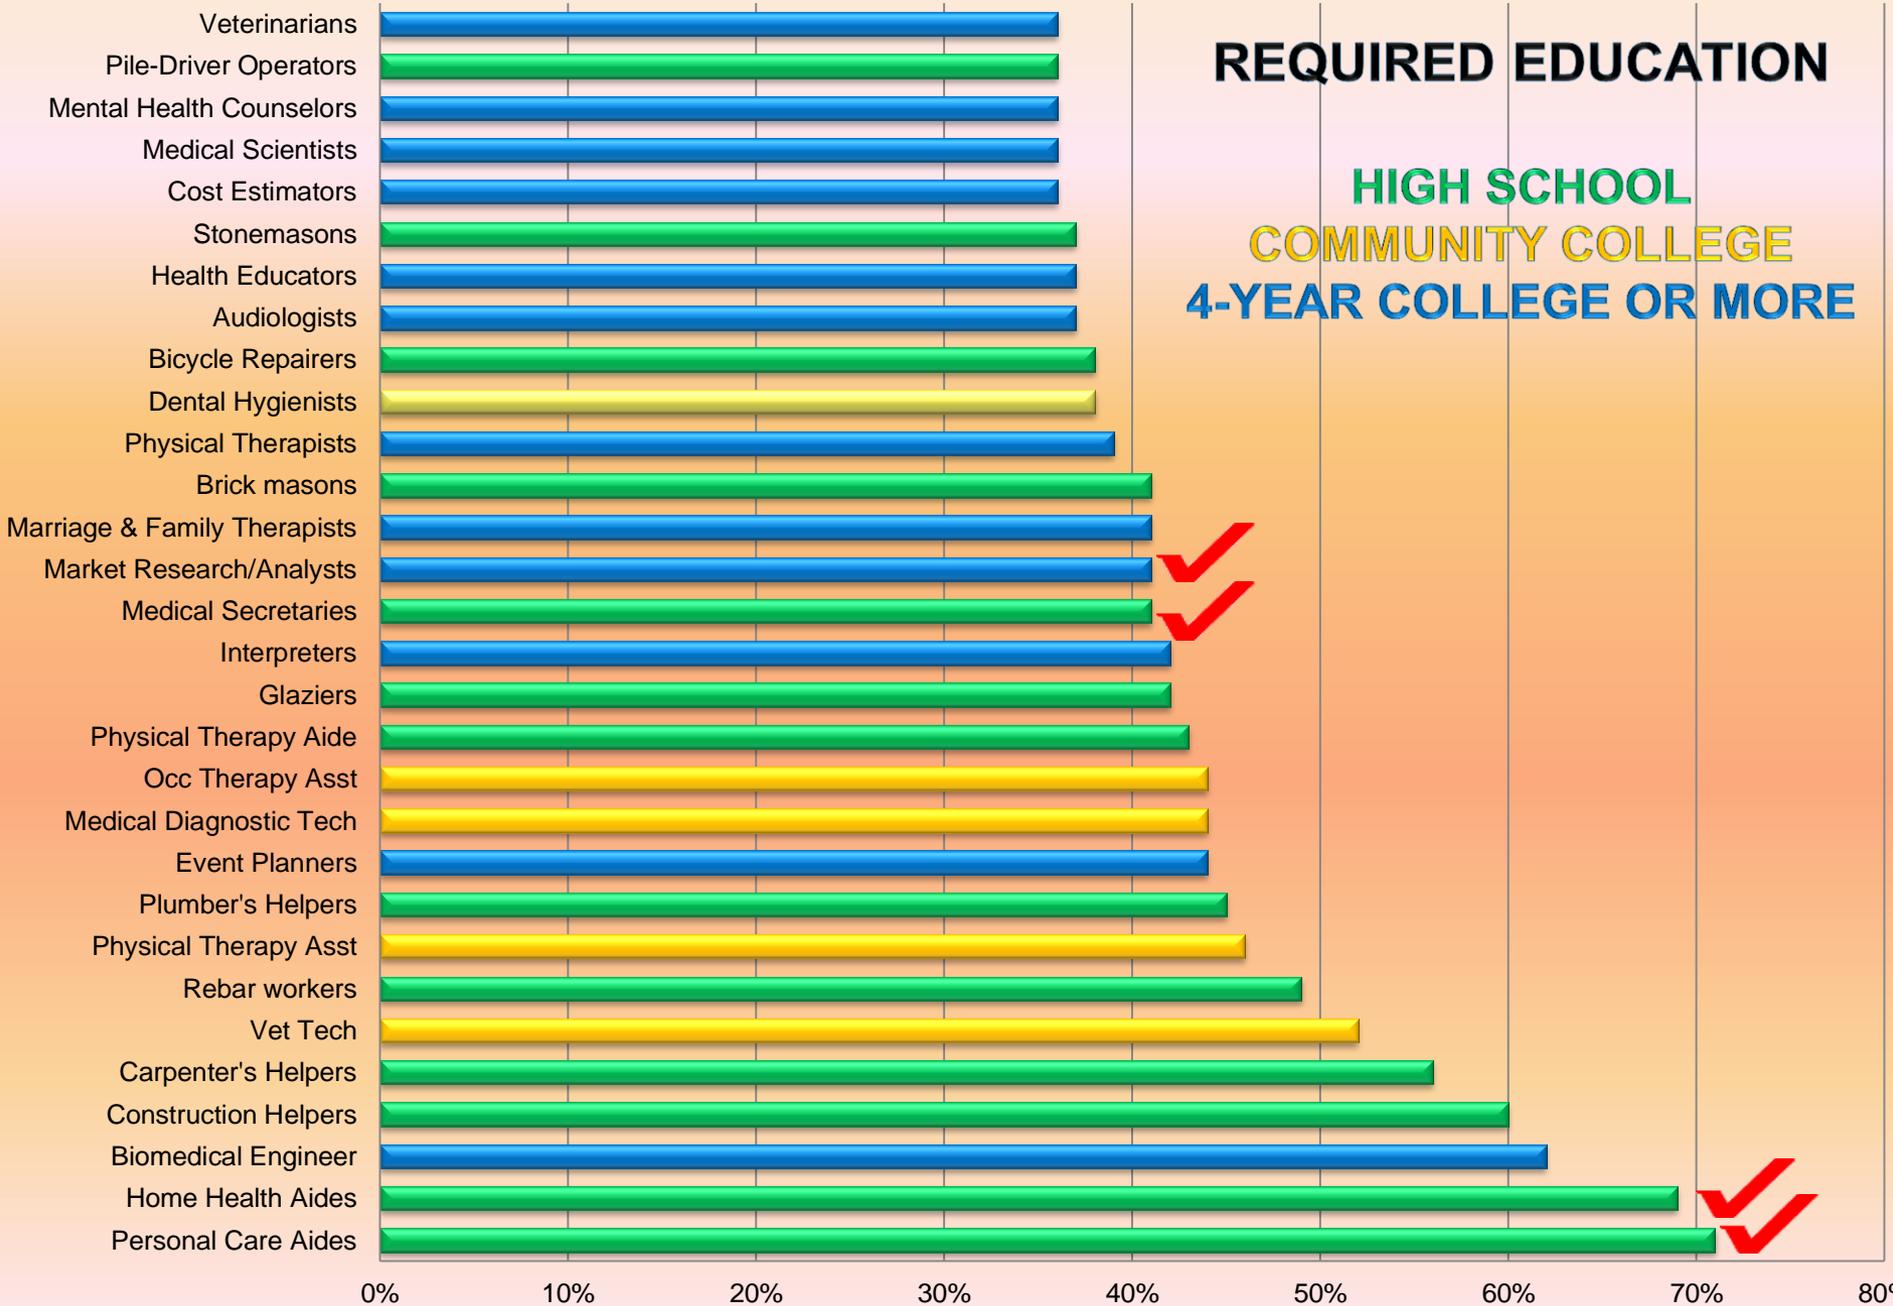

A laptop computer is shown in the lower-left corner, partially obscured by a large, glowing blue and yellow arc that curves across the top of the image. The background is filled with a pattern of binary code (0s and 1s) in a light blue color, creating a digital or technological atmosphere.

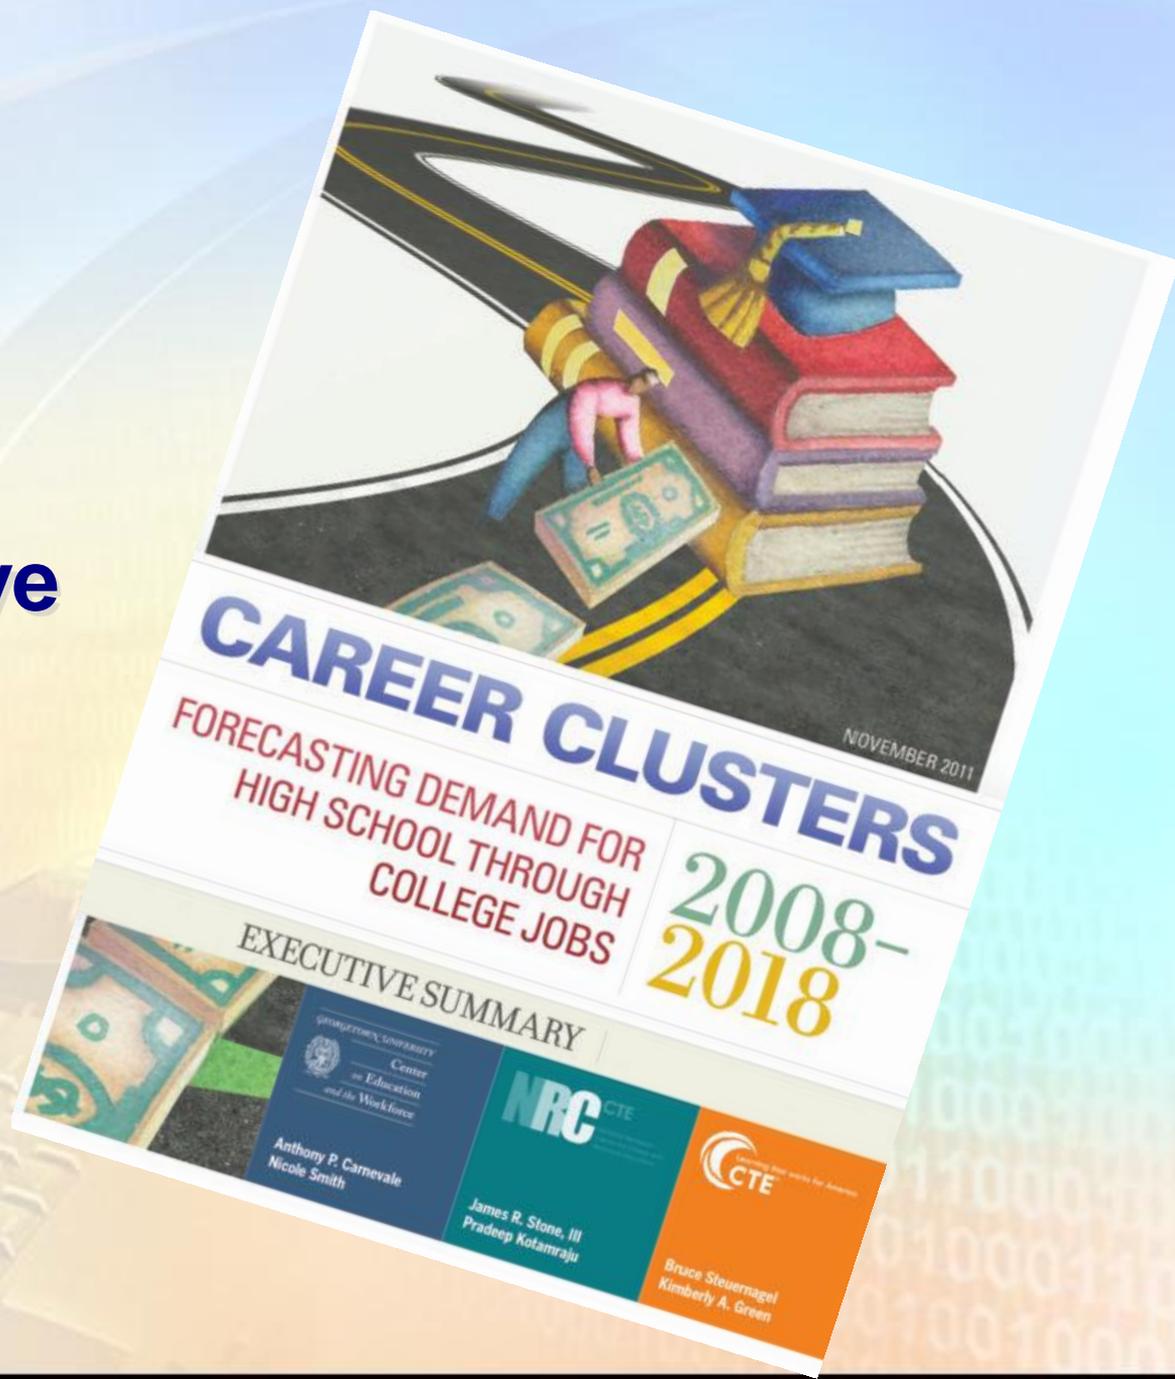

40 percent of (college grads) not enrolled in graduate education say they are employed in a job where a college degree “is not required.”

Paul Barton, ETS, 2006

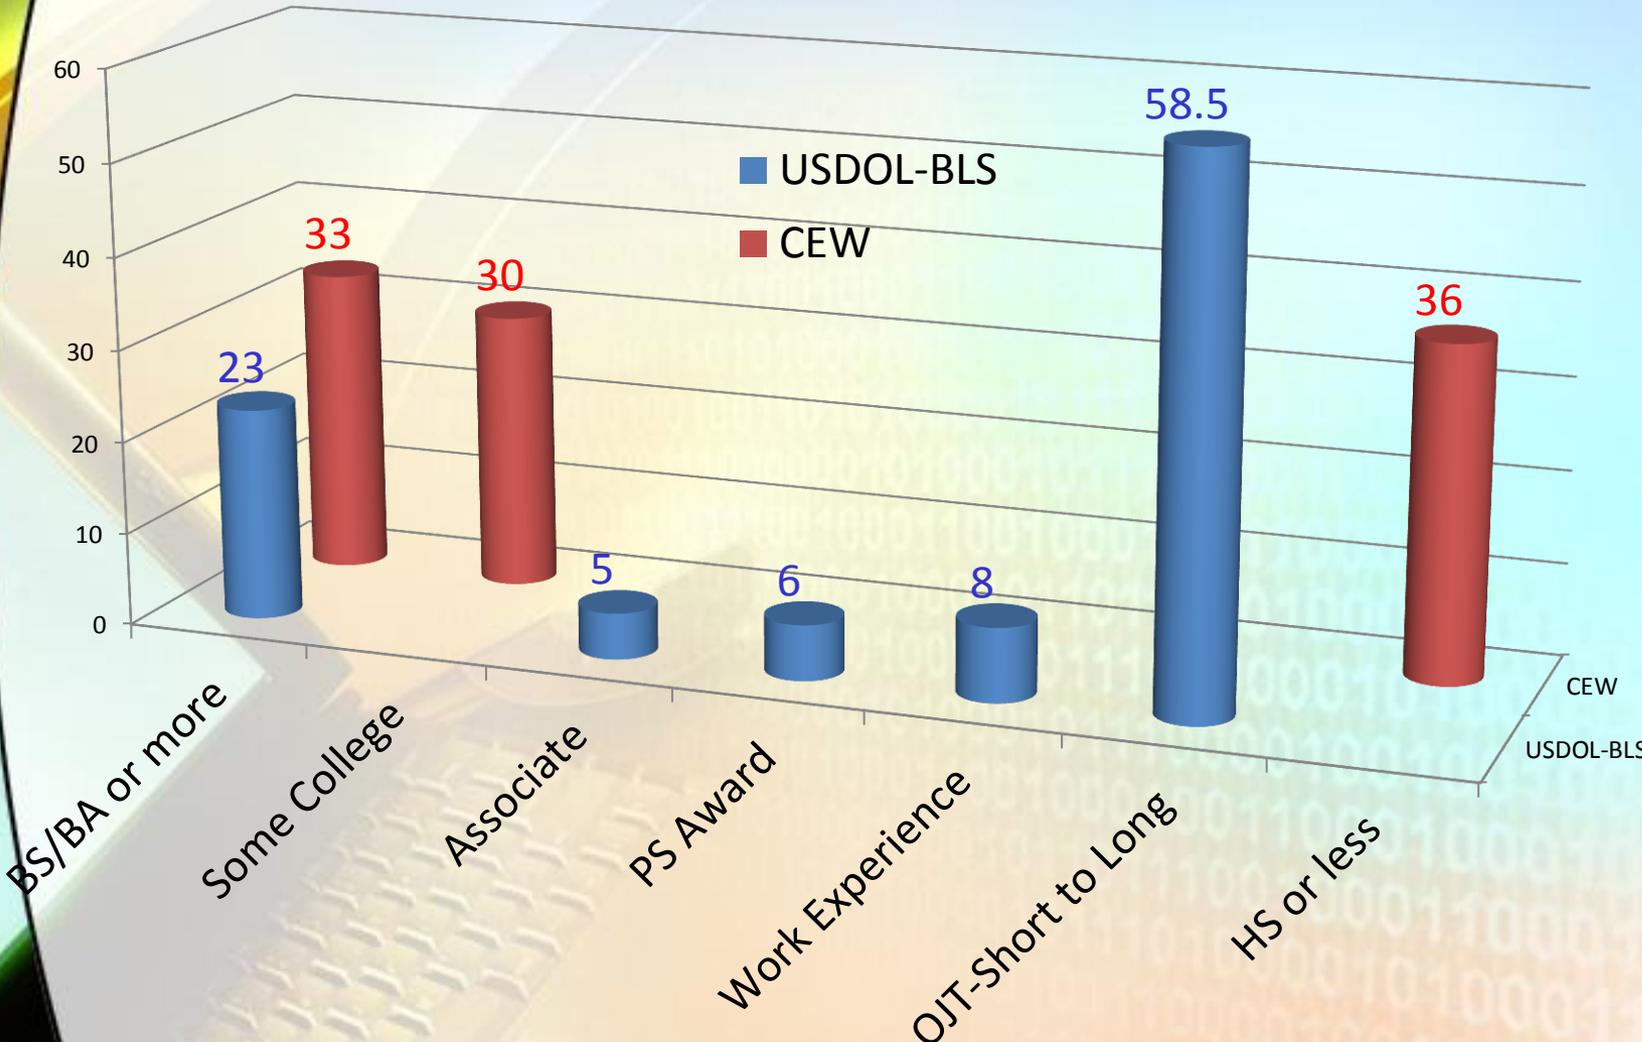

High Growth Occupations 2010-2020

A Second Perspective

Education and Future Work: BLS & CEW

A 3rd Perspective

Erik Brynjolfsson
Andrew McAfee

Race Against The Machine

How the Digital Revolution is Accelerating Innovation,
Driving Productivity, and Irreversibly Transforming
Employment and the Economy

Computers now exhibit human-like capabilities not just in games such as chess, but also in complex communication such as linguistic translation and speech. These new abilities stem from “pattern recognition” technologies – the same techniques that underpin, for example, the Siri voice recognition tool in Apple’s iPhone 4S.

A 3rd Perspective: The Race Against the Machine (The Machines are Winning?)

- ↙ The Google car (truck?)
- ↙ IBM Watson
- ↙ Deep Blue
- ↙ The “Square”
- ↙ Text readers/
Pattern recognition
(goodbye legions of lawyers-only 60% accurate)
- ↙ Automated ‘call centers’
(goodbye India)
- ↙ GeoFluent (goodbye translators)
- ↙ Vending machines for ... everything

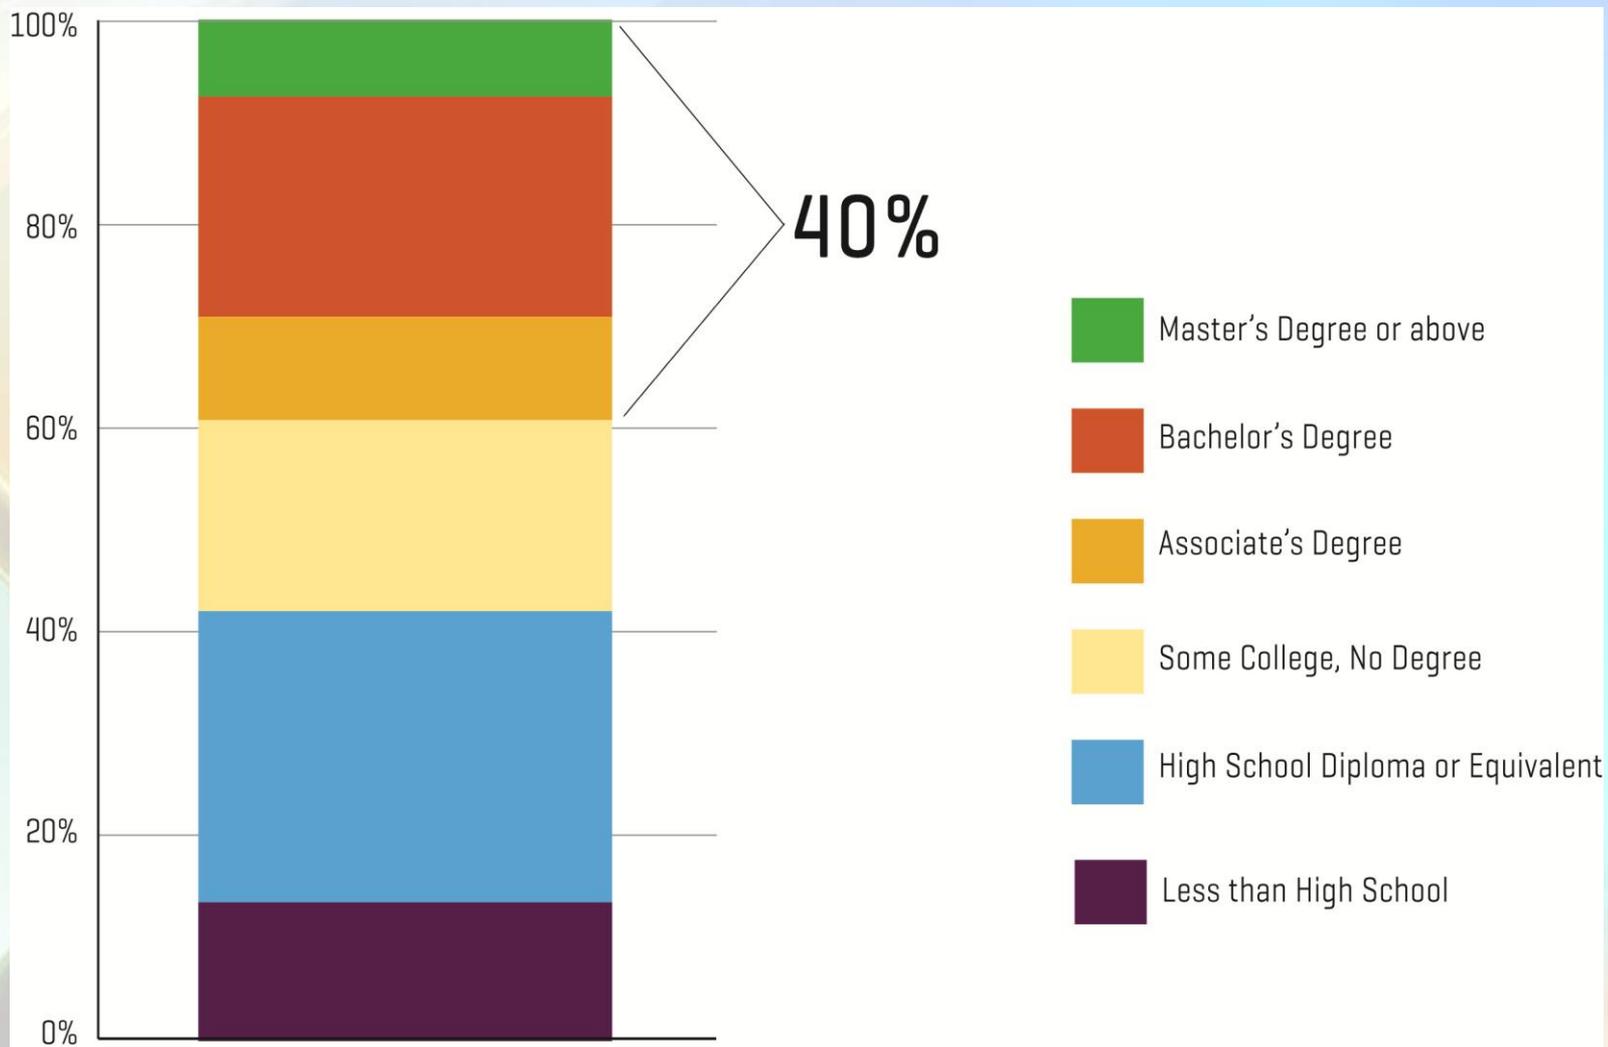

Can People Win?

- ↘ Instructional methods
- ↘ Softer skills
- ↘ Instructional focus
- ↘ The Human Advantage (for now)
- ↘ Khan Academy
- ↘ CTSOs/WBL
- ↘ Hyperspecialists, entrepreneurship
- ↘ Physicality of work
- ↘ Advanced pattern recognition
- ↘ General problem solving
- ↘ Creativity

EDUCATION AND EARNINGS

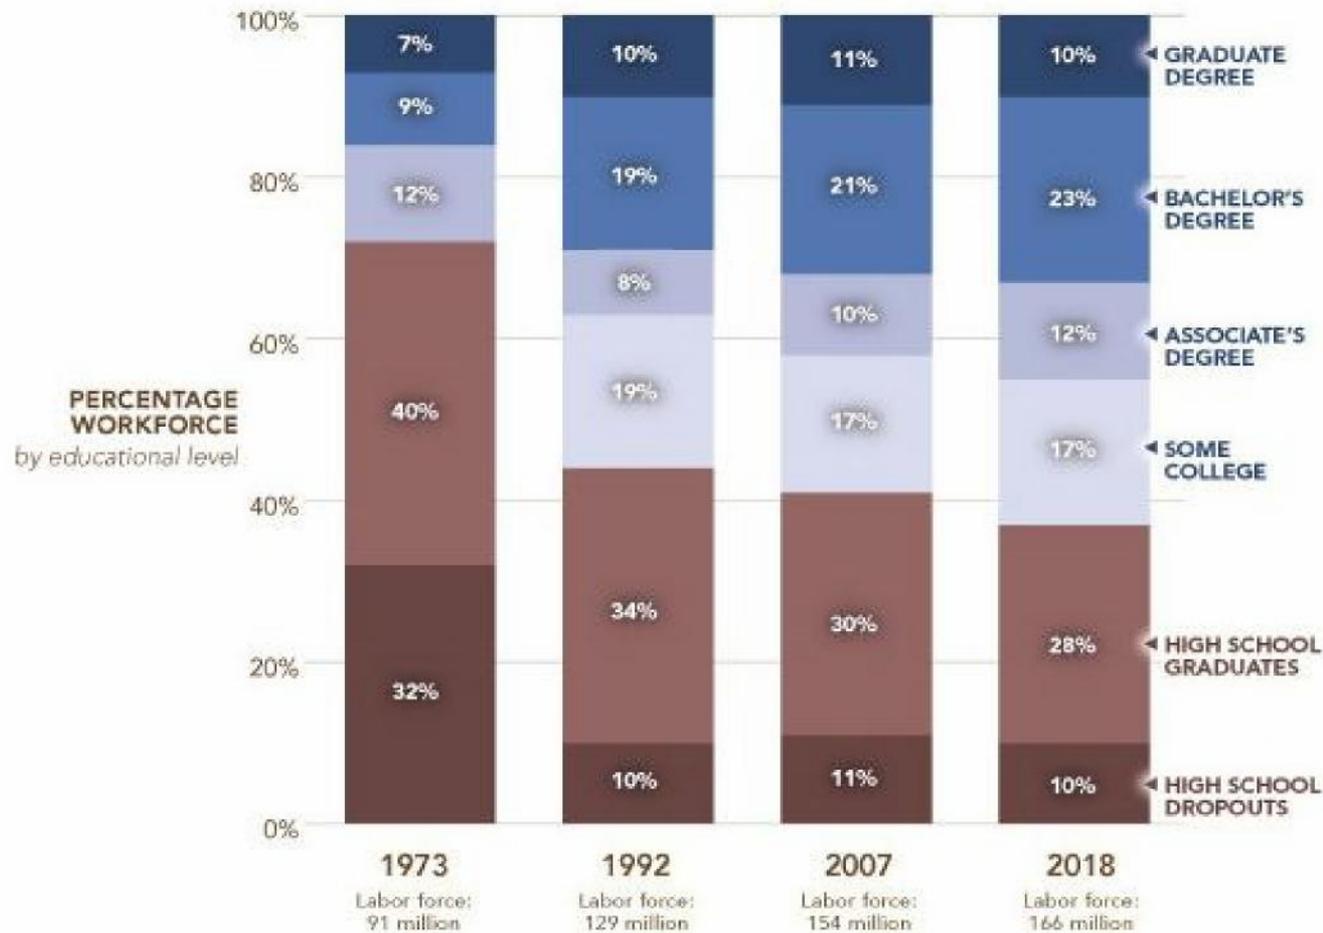

College for all? Only 40% of 27-year olds have earned an A.A. degree or higher

Educational Attainment, by Age 26-27

Note: Represents data collected in surveys between 2006-2008; GED is approximation based on data from GED Testing Program.
Source: Current Population Survey Annual Social and Economic Supplement.

▾ 63% of all jobs will require
 ▾ some college or better by 2018.

**Council on
Competitiveness
2008 Report: The
Skills Imperative**

**Meet the Demand for
Middle Skills**

- ▾ Middle-skilled jobs represent the largest number of total openings in the United States until 2016, and the United States is failing to adequately train Americans to take advantage of this opportunity.
- ▾ These jobs do not always require a college degree, but most require training, technical sophistication and initiative.
- ▾ They pay well and do not offshore easily.

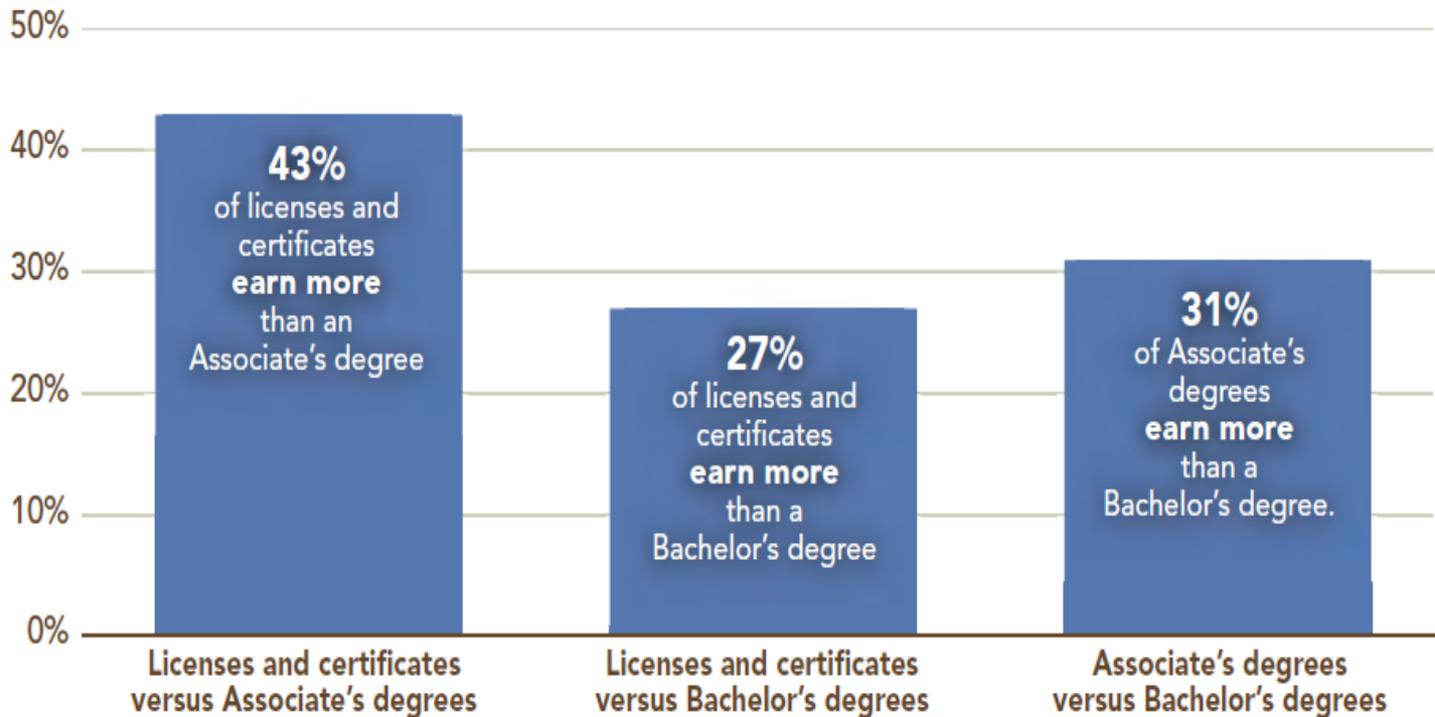

Reality

Middle Skill Credentials Pay Off

FIGURE 5.12

Earnings are not just a function of postsecondary attainment. Occupational choice also influences earnings potential.

Source: National Education Longitudinal Study 2000

Middle Skill Occupations (B.A./B.S. NOT Required)

Occupation	Salary
Air Traffic Controller	102,300
Storage and distribution manager	66,600
Transportation manager	66,600
Non-retail sales manager	59,300
Forest fire fighting/prevention supervisor	58,920
Municipal fire fighting/prevention supervisor	58,902
Real estate broker	58,720
Elevator installers and repairer	58,710
Dental hygienist	58,350
Immigration and Customs inspector	53,990
Commercial pilot	53,870

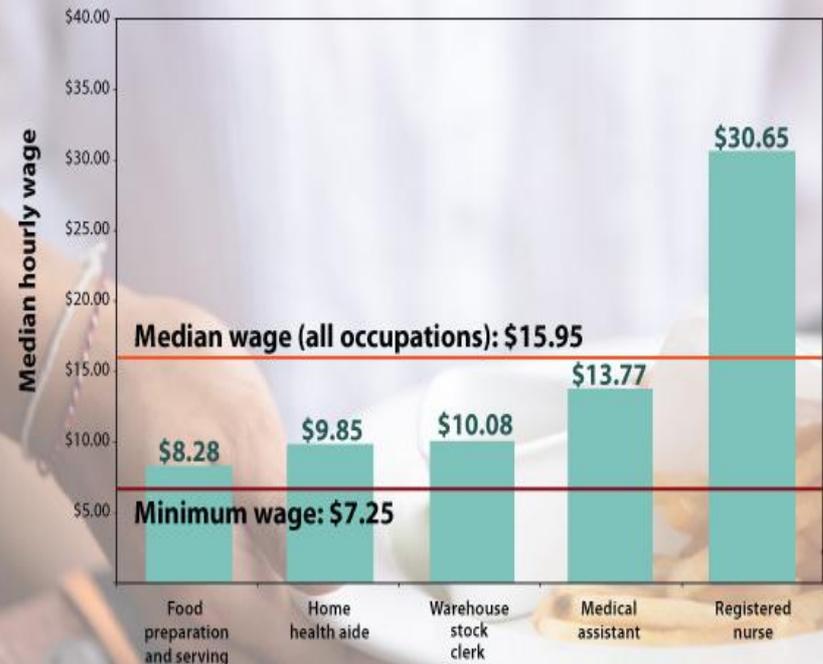

Farr, M. & Shatkin, L. (2006) *The 300 Best Jobs That Don't Require a Four-Year Degree*. (US Department of Labor, Bureau of Labor Statistics)

In the total labor market . . . Another indicator

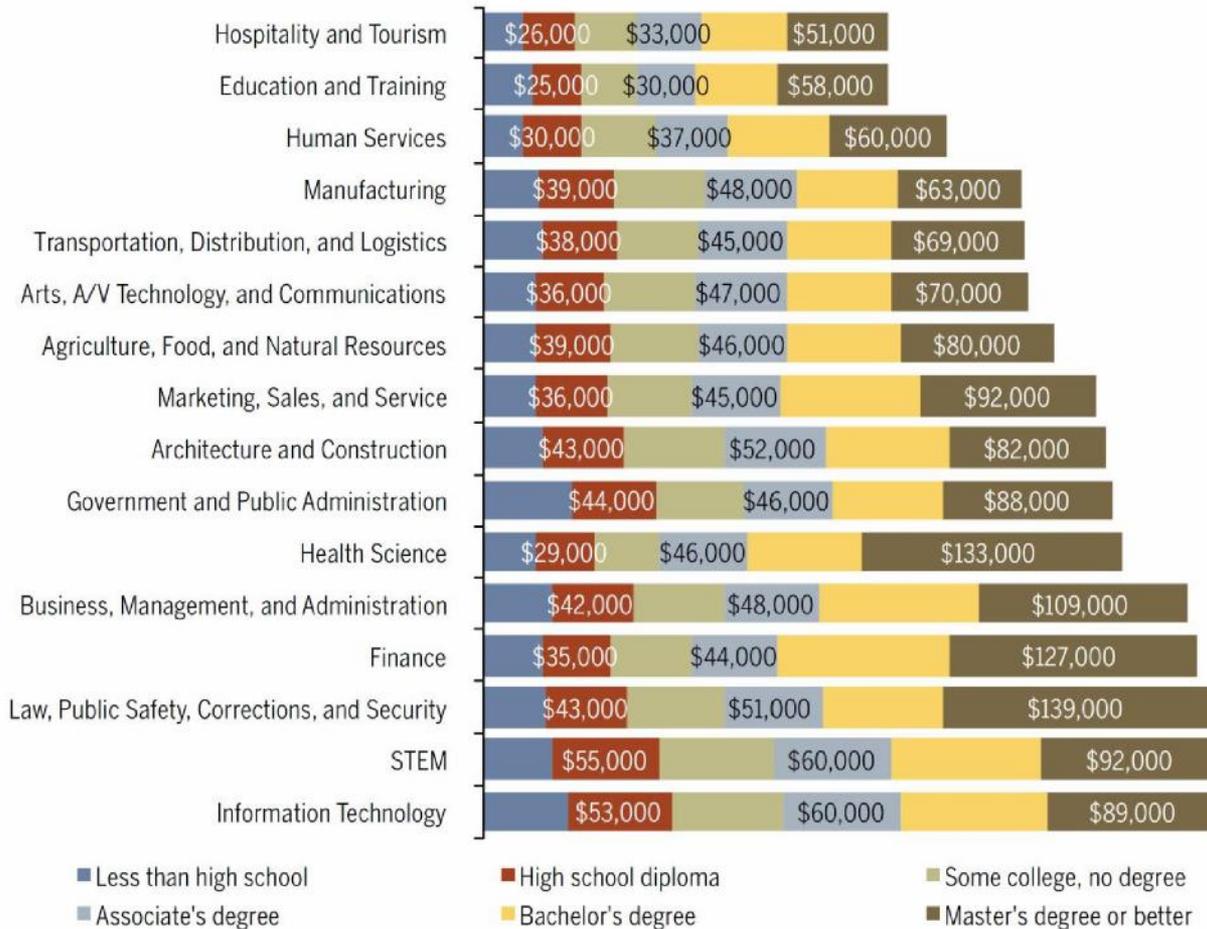

Five fastest growing occupations

Finishing High School: A Necessary First Condition for College OR Careers

- ▣ Plank (2001) found CTE a significant factor in reducing the likelihood of dropping out of high school (NELS 88 data): a 1:2 ratio
- ▣ Plank, DeLuca, & Estacion (2005) found CTE a significant factor in reducing the likelihood of dropping out of high school (NLSY97): a 1:2 ratio
- ▣ Castellano, Stone, Stringfield & others (2007) found CTE course taking in 3 high poverty communities significantly increased the likelihood of high school graduation (NRC longitudinal data).

Class of 2004

CTE & Engagement

Preliminary Analyses:
Comparison Groups
Matter

CTE is the 2nd strongest predictor of completing high school

We have a boy problem

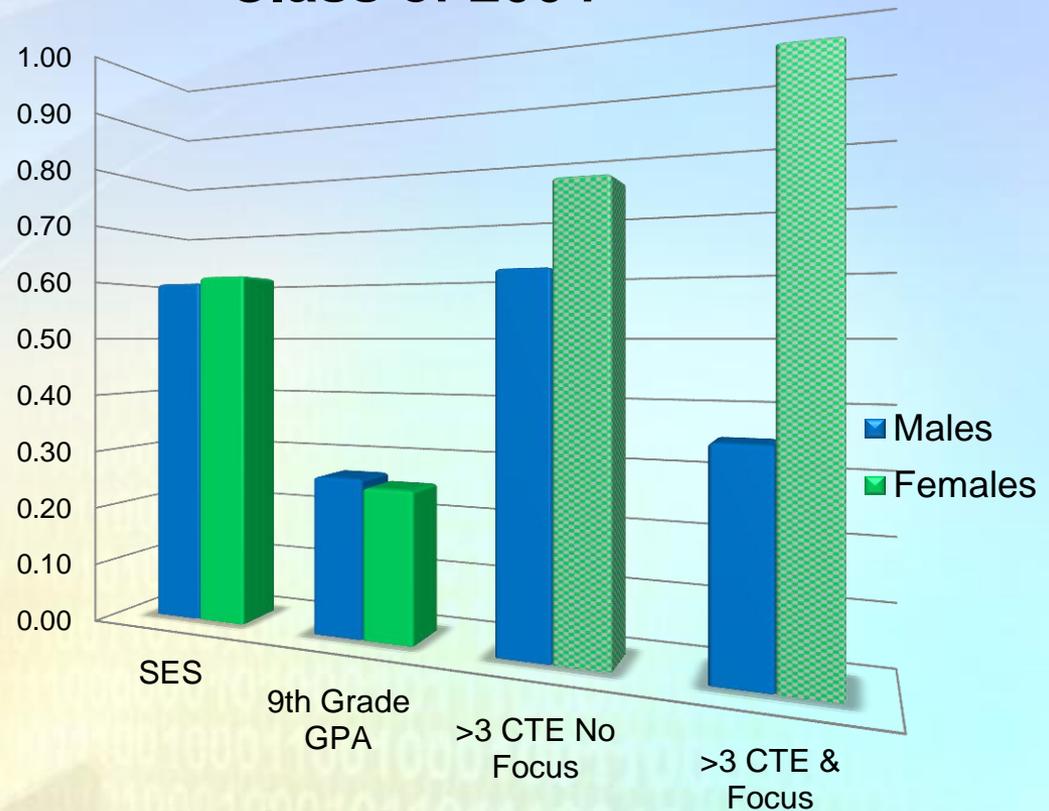

... but many of the people who don't fit in are boys. A decade or so ago, people started writing books and articles on the boy crisis. At the time, the evidence was disputable and some experts pushed back. Since then, the evidence that boys are falling behind has mounted. The case is closed. The numbers for boys get worse and worse.

David Brooks, NYT July 5, 2012

- ↳ By 12th grade, male reading scores are below females'
- ↳ 11th grade boys write at an 8th grade girl level
- ↳ Boys used to have an advantage in math and science, but that gap is nearly gone.
- ↳ Boys are more likely to have discipline problems
- ↳ Boys account for $\frac{3}{4}$ all D's and F's
- ↳ Men are a minority in college (40%)
- ↳ 2 million fewer men graduate from college over the past decade than women
- ↳ Grad school gap is even higher

A Survival Analysis

Class of 2004

CTE Participation helps boys
“survive” high school

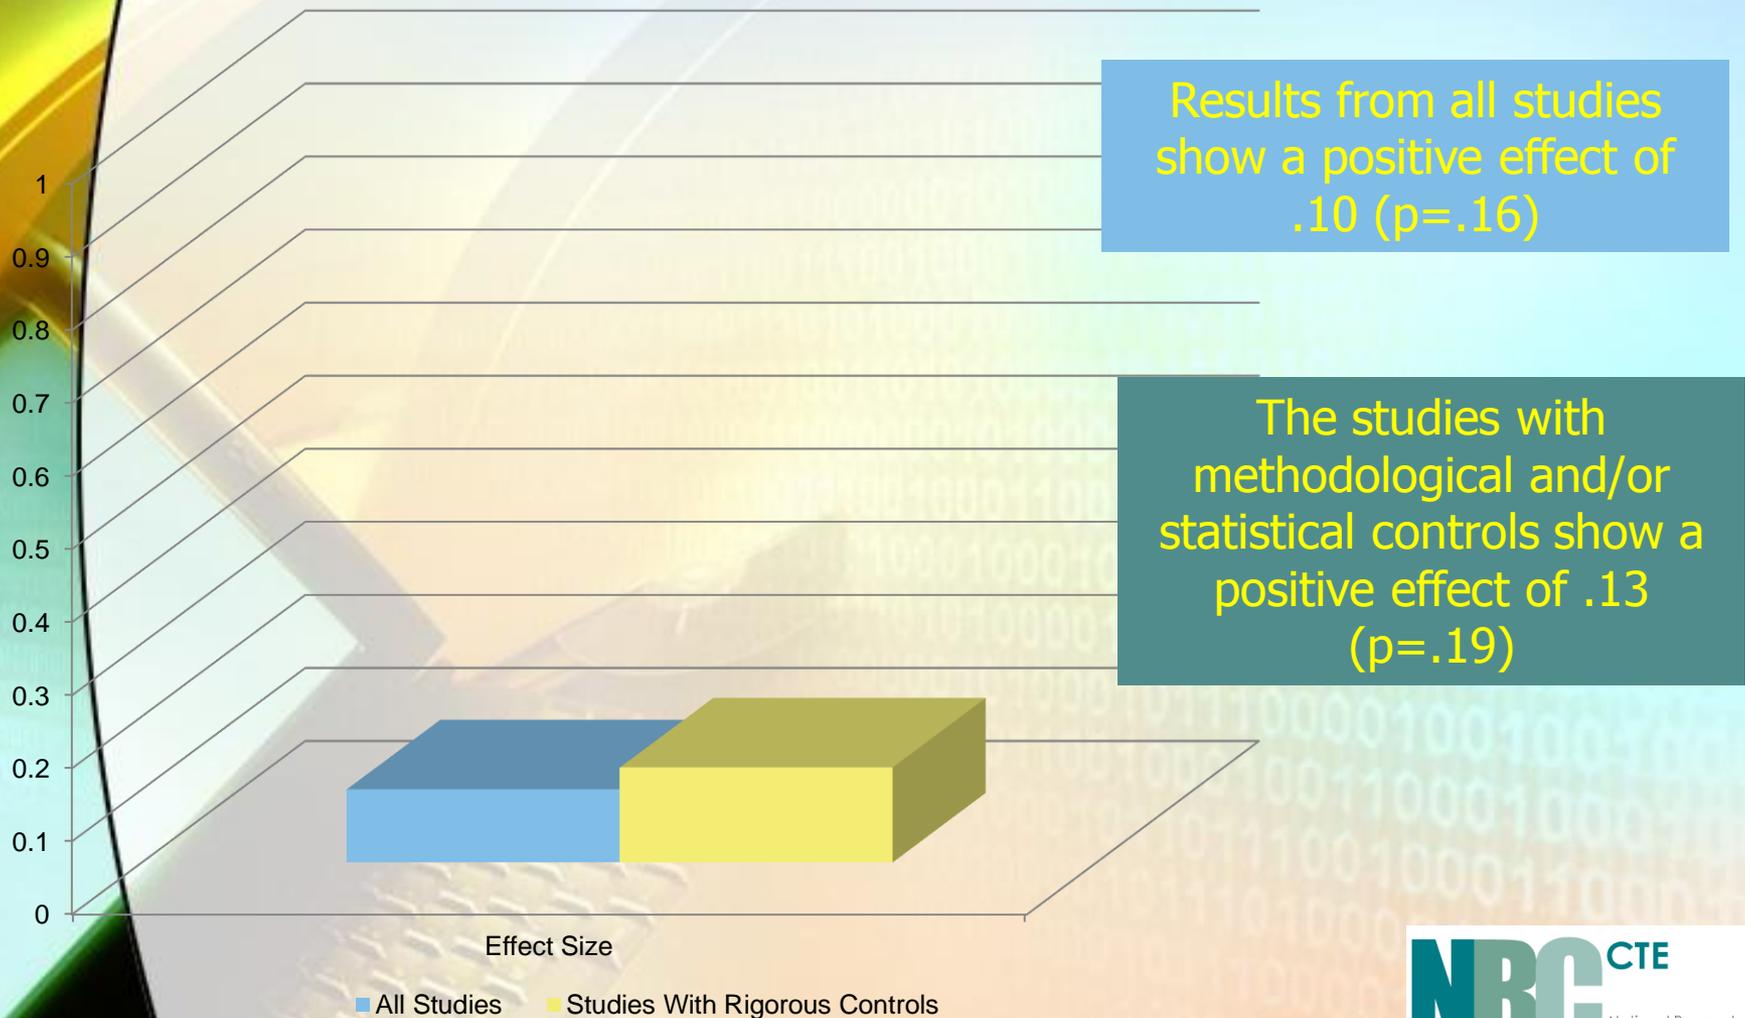

*There is no CTE “survival” effect for
girls; but it “does no harm”*

Building the Model Health Care Education Program

Unique Cognitive Skills

Academic Foundations

- ↙ Use a knowledge of human structure and function to conduct health care role.
- ↙ Use a knowledge of diseases and disorders to conduct health care role.

Systems Knowledge

- ↙ Explain systems theory as it applies to the health care environment.
- ↙ Explain the health care delivery system.
- ↙ Health care workers will understand the existing and potential hazards to clients, co-workers, and self. They will prevent injury or illness through safe work practices and follow health and safety policies and procedures.
- ↙ Explain the concept of system change as it applies to the health care environment.

More Unique Skills: Safety & Environmental Knowledge

- ✚ Explain infection control practices and procedures.
- ✚ Employ personal safety practices.
- ✚ Use techniques to insure environmental safety.
- ✚ Identify common safety hazards.
- ✚ Use emergency procedures and protocols.
- ✚ Describe healthy behaviors.

- ✚ **No community service; 3.02 college GPA**
- ✚ **58% with NO HS WBL; college GPA above 3.0**
- ✚ **HS WBL; 3.08 college GPA**
- ✚ **Community service; 3.11 college GPA**
- ✚ **64% of with HS WBL; college GPA above 3.0**

Swail, Watson S., and Kampits, Eva (2004). Work-Based Learning and Higher Education: A Research Perspective. Washington, DC: Educational Policy Institute, Inc.

The Value of WBL

Nations enrolling a ***large proportion of upper-secondary students in vocational programs that include heavy doses of WBL*** have significantly higher:

- ▾ school attendance rates
- ▾ higher upper-secondary completion rates
- ▾ college attendance

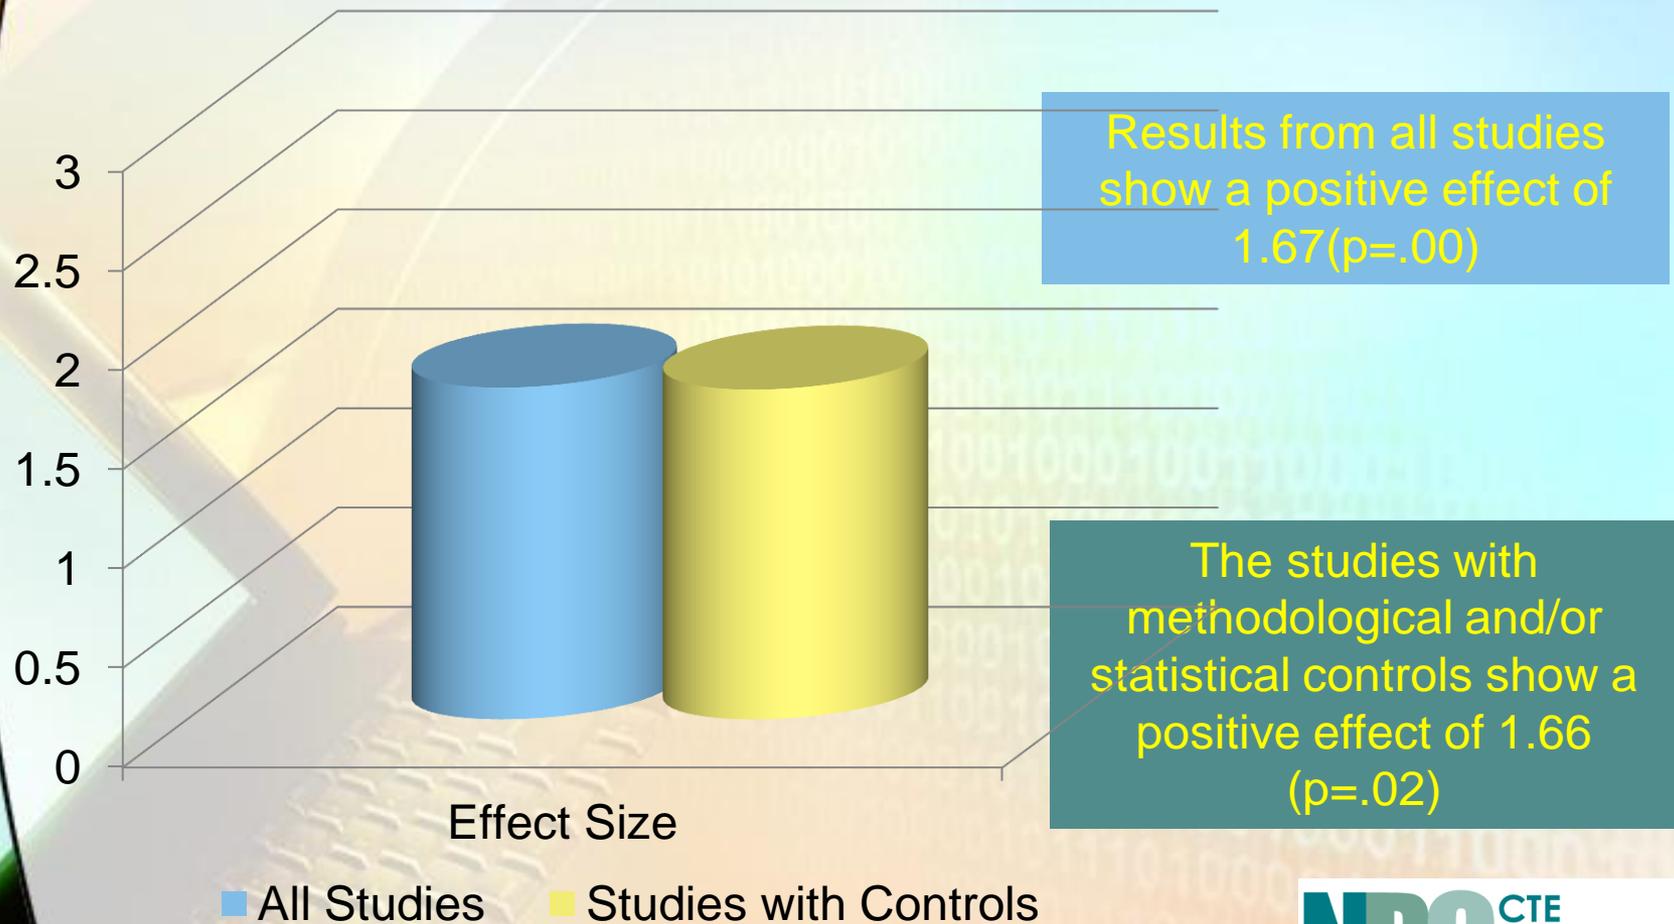

To the workplace, to continuing education

CTE & TRANSITION

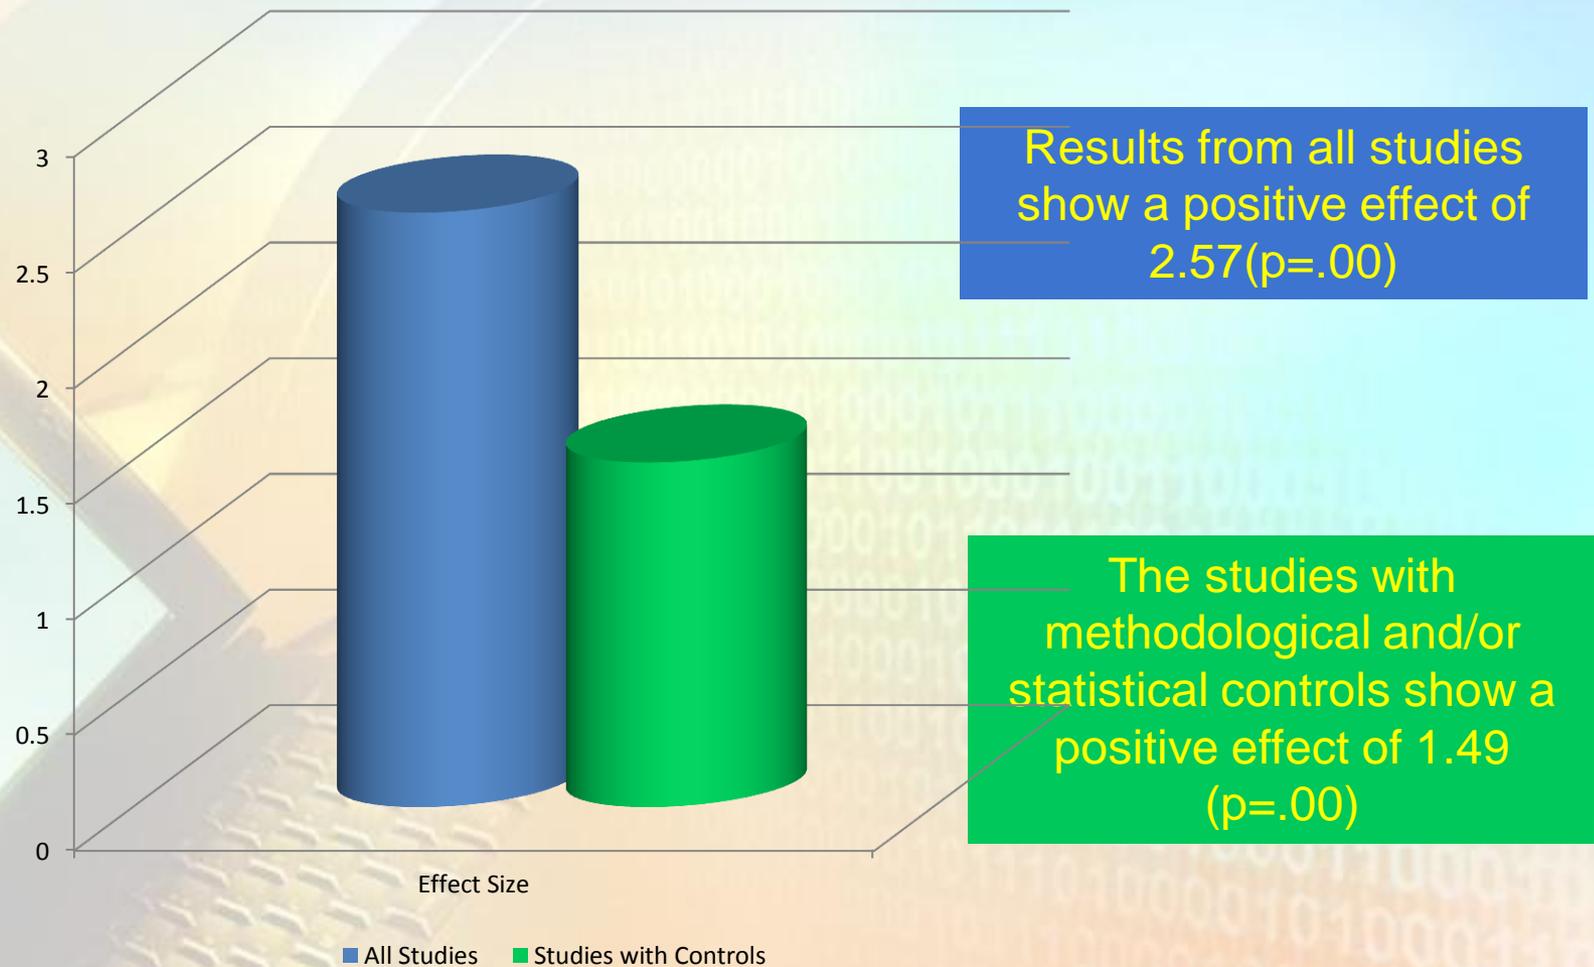

Findings from National Data

Meta Analysis CTE Participation & College Enrollment: Average Effects

Meta Analysis CTE Participation & Employment

Making High School Matter:

**YOU - TAKE A LEADERSHIP ROLE IN
MOVING CTE TO THE NEXT LEVEL**

To change this reality, I Imagine the future CTE ...

- *World class curriculum...*
 - Critical thinking developed by using academic skills to solve real problems in class and on the job
 - Builds related academic, occupational and technical skills
- *Delivered by world class teachers who:*
 - are technical masters
 - can link related academics to technical content
 - supported by employers who engage your students

A future where students benefit from . . .

▾ Classroom instruction

▾ Work based learning- WBL

▾ CTSOs

- ▾ *Project based learning*
- ▾ *Contextualized learning*

- ▾ *Labs*
- ▾ *Shops*
- ▾ *Job shadowing*
- ▾ *Internships*
- ▾ *School-based enterprise*
- ▾ *Cooperative education*
- ▾ *Apprenticeships*

- ▾ *Leadership development*
- ▾ *Professional development*
- ▾ *Service/social engagement*
- ▾ *Competitive events*

A future CTE that is nested in . . .

▾ Rigorous Programs (Such as):

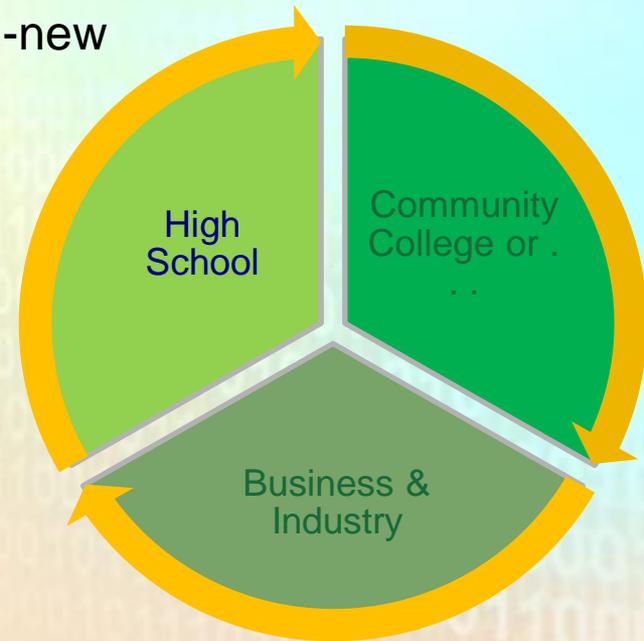

- Programs of Study (early NRCCTE evidence)
- Career academies – some evidence
- Toyota model – early evidence
- HSTW – strong correlational evidence
- Project Lead the Way – strong internal evaluations
- NCEE Board Examination Model-new
- Linked Learning (CA)

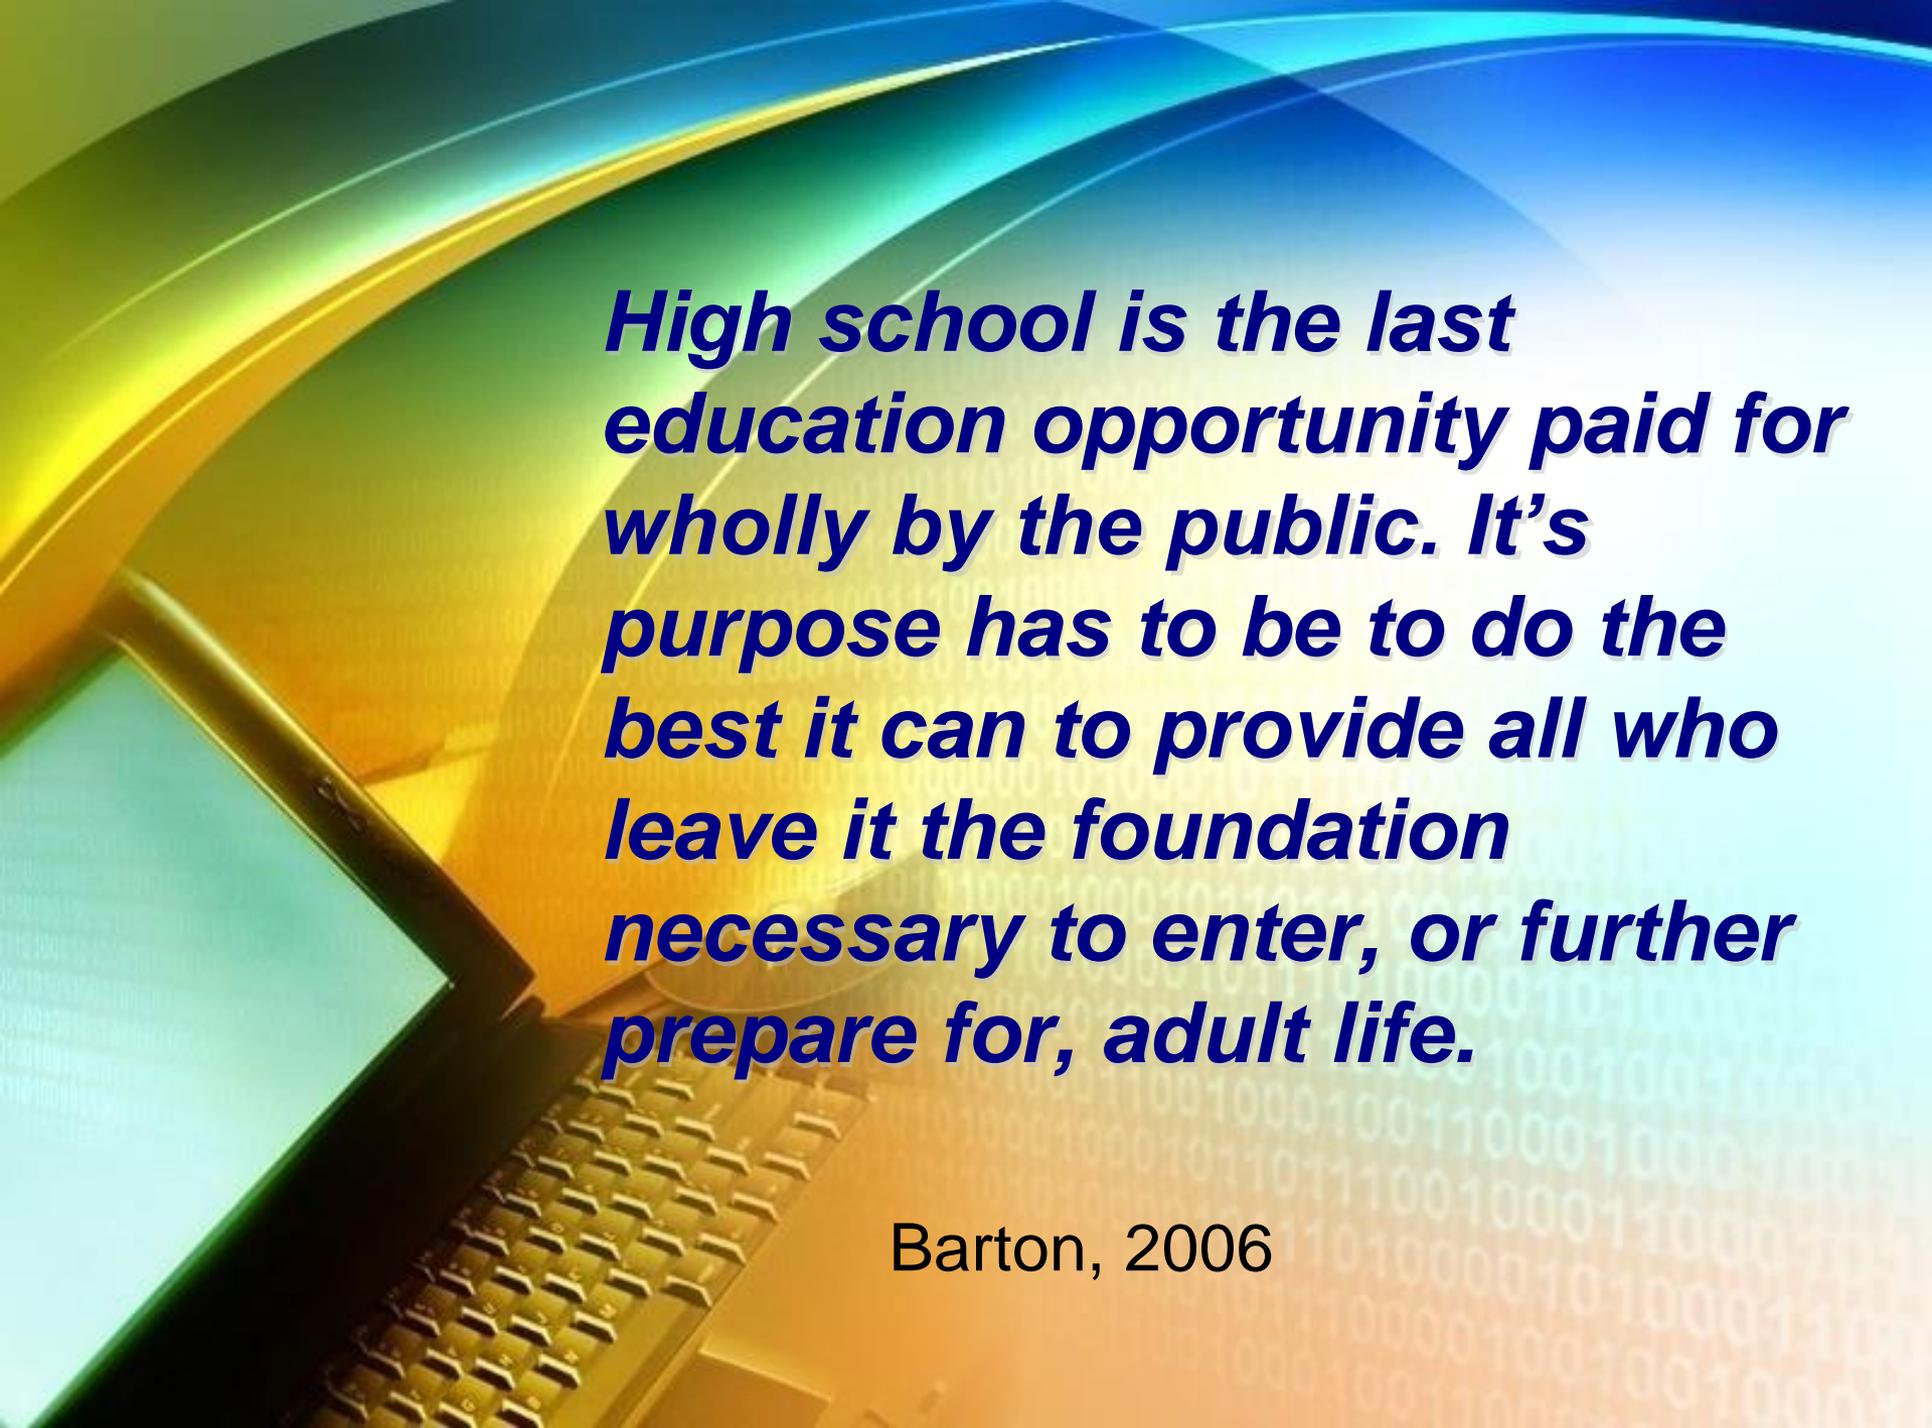

▾ That incorporate:

- Robust Career Development
- Integrated learning
- Link to industry credentials
- Dual/Concurrent Enrollment
- Entrepreneurship

▾ Built around Consortia

▾ Supported by Professional Development

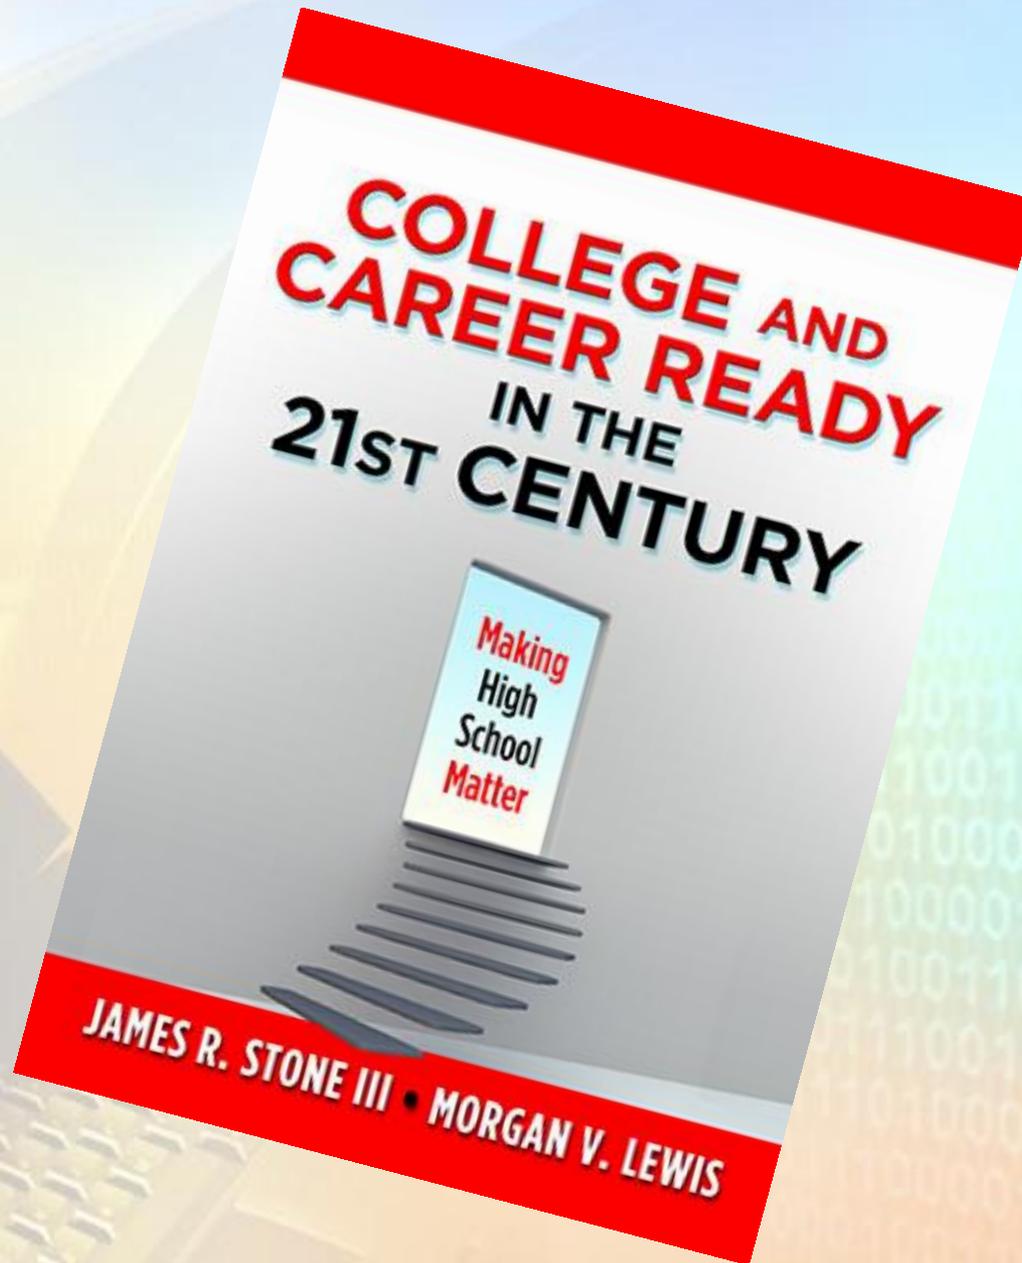

High school is the last education opportunity paid for wholly by the public. It's purpose has to be to do the best it can to provide all who leave it the foundation necessary to enter, or further prepare for, adult life.

Barton, 2006

Shameless Promotion . . .
