

# The SREB Region's Economic Outlook

*The Potential Impact of Automation and AI*

---

This infographic was prepared by Meagan Crowe, policy analyst, under the leadership of Jeff Gagné, director of policy analysis, and Joan Lord, vice president of education data, policy research and programs.

# The SREB Region's Economic Outlook

Most of the 50 million workers in the region will be affected by automation in the coming decades

If state and business leaders do not act

workers and their children could be unemployable or stuck in low-wage jobs: an endless cycle of poverty

This multigenerational cycle, combined with rising workforce skill demands, means more workers of all educational attainment levels will be:

unemployed or underemployed

earning incomes below the poverty level

reliant on state services

Just 5% of jobs are completely automatable, but 44% of all work activities have automation potential. In the top 5 industries the potential is often greater:

Note: The top five industries employ the most people.

Business & industry will need increasing numbers of workers with middle & high skills

## Are students prepared?

Parents today: 25 to 44 year-olds

37% had a high school credential or less in 2017

Of 8th graders whose parents had no education after high school

36% were below Basic on NAEP reading and

48% were below Basic on NAEP math

These percentages were just

22% 32%

for students whose parents had some education beyond high school
