

SREB's Readiness Digital Tool Suite

What is the Readiness Digital Tool Suite?

SREB is excited to present our **Readiness Digital Tool Suite**, a web-based learning management system (LMS).

Across the U.S., thousands of teachers are using SREB's Readiness Courses to help underprepared students succeed in rigorous high school and college course work. Our evidence-based Readiness curriculum gives students the tools, knowledge and strategies they need to apply mathematics and literacy skills to solve problems and build a deeper understanding of their communities and their world.

Now those same resources are available through SREB's Readiness Digital Tool Suite. We use a Canvas-based interactive platform to house all Readiness lessons, links and activities in one easy-to-access central location.

All Readiness learning activities previously available only through PDFs are now **interactive learning tools** that harness the power of platforms like Desmos, Google Docs, Google Slides and Jamboard. Teachers can create their own digital copies of *any* resource, activity or lesson from *all* Readiness courses and upload them into their LMS (Google Classroom, Canvas, Schoology, etc.) for students to access them.

Why purchase access to SREB's Readiness Digital Tool Suite?

Schools and districts have intensified their use of learning management systems like Google Classroom, Canvas and Schoology.

The Readiness Digital Tool Suite offers an online environment in which teachers can quickly find and upload any of hundreds of interactive activities and web-based resources directly to their LMS for students to use to demonstrate their understanding.

What can you do with access to SREB's Readiness Digital Tool Suite?

Instead of...	You can...
Making paper copies of each activity in the Academic Notebook	Make digital copies and upload them to your LMS
Scrolling through a single PDF for each lesson and activity	Quickly and easily find any lesson and activity through our Canvas portal
Recreating lessons so students can use them digitally	Access interactive activities we've created using Google Docs or Slides, Desmos and other tools
Working by yourself to update and adapt curriculum for your class	Connect with a network of teachers using the same curriculum and receive updates from peers and SREB coaches about new tools, ideas and approaches for implementing the curriculum

How do I gain access to SREB's Readiness Digital Tool Suite?

Get started with SREB's Readiness Digital Tool Suite for less than the cost of printing the Academic Notebook for individual students. The cost is \$250 for one year of access to SREB's Canvas LMS for the course(s) you are teaching.
